ABOUT BREAKBULK EVENTS & MEDIA

Headquartered in London, Breakbulk organizes three events each year, Breakbulk Americas in Houston, Breakbulk Middle East in Dubai and Breakbulk Europe in Rotterdam. Our publications include a bimonthly magazine, a weekly digital newsletter and a news and event website with effective advertising opportunities in each. For more information, go to www.breakbulk.com

FROM THE PORTFOLIO DIRECTOR

Hello to the many industry professionals here at Breakbulk Europe!

We are delighted to be returning to Ahoy, Rotterdam for the second year. Big thank you to the Port of Rotterdam for its tremendous support as our host port, preparing the city to welcome the thousands of "Breakbulkbulkers" who have come from all over the world to attend this year's event.

Once again uniting the project cargo and breakbulk industry, bringing together over 4,000 companies across our 3-day event, Breakbulk Europe truly provides the ultimate networking platform to grow your connections, generate new business and strengthen key existing relationships. Joining industry decision makers to drive the connections and innovation that support the completion of global projects.

As we gather together at Rotterdam Ahoy, you'll notice many new features and returning favourites to make your time here even more productive and enjoyable.

The launch of Breakbulk Futures in Hall 2 will showcase the innovation and technology shaping the future of the breakbulk industry. This space will bring together startups, students and industry leaders to collaborate, present their ideas on our Breakbulk Futures Stage and discover how to maximise the opportunities available to them across the industry.

Hall 2 is also the home of the Breakbulk Global Shipper Network Lounge—an area for our project owners, manufacturers, EPCs, energy

and other project decision-makers, you can't miss the large bar perfect for refreshments and networking breaks.

The Main Stage conference has a new location in Hall 1, alongside the Breakbulk Studios. You won't miss this year's Energy Transition on the move photo contest in the foyer between Hall 1 & 2 entrances. Remember to take a snap and check in at #BBEU23!

We know networking is one of the most important reasons to attend Breakbulk Europe, and there are several planned activities to boost the connections you'll make this year.

Beginning on Tuesday evening, we'll host the Welcome Reception at Ahoy, followed by a community party, Breakbulk Boulevard, at Schiedamse Vest.

Wednesday morning will start in the city centre with the Breakbulk BUSINESSrun, while over at Ahoy, the Women in Breakbulk breakfast,

will bring together the event's female contingent above the halls in Dock 1. To close Wednesday's festivities, the Port of Rotterdam has organised a Spido boat tour where registrants can network as they tour the port facilities from the water.

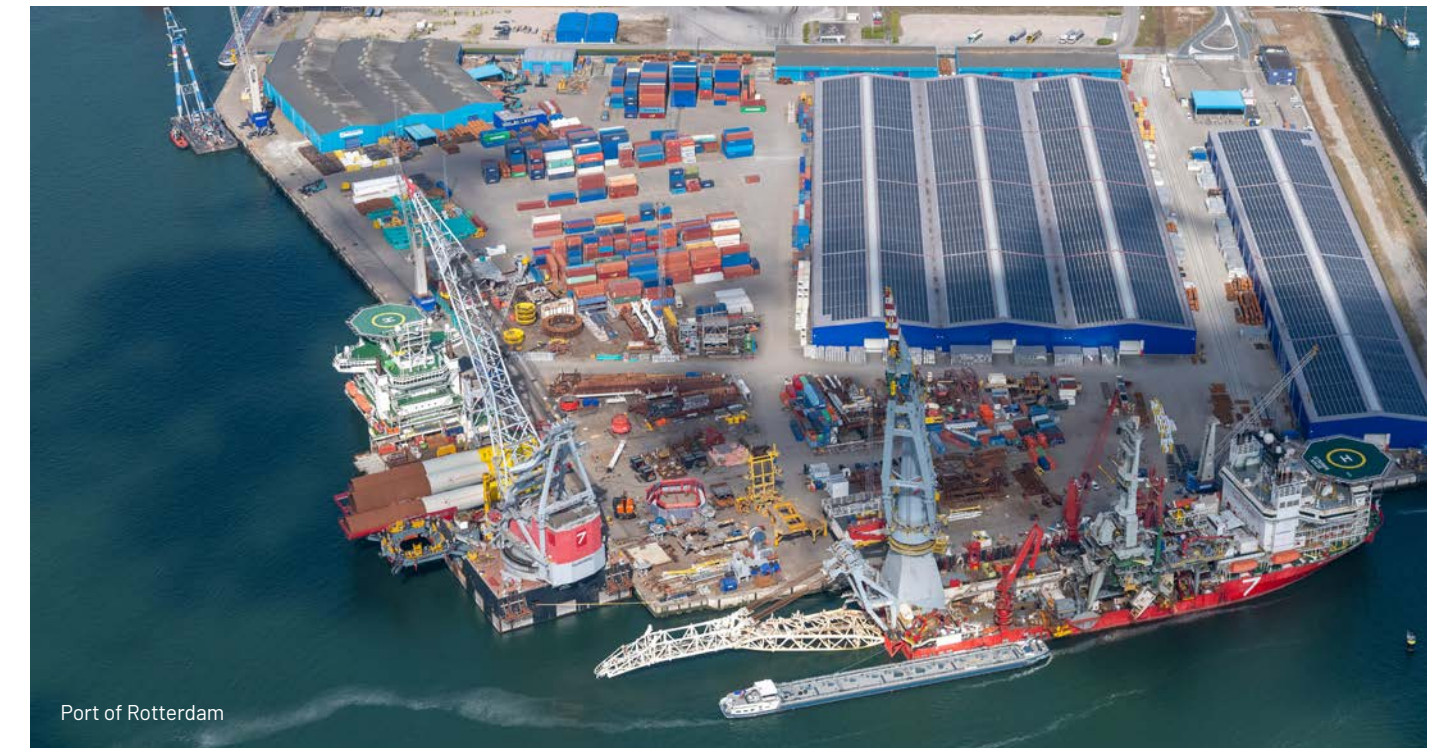

Both days will feature Main Stage conference sessions covering the industry's most important topics from Offshore Wind to Nuclear Power, a Business and Project Outlook and much more. Don't miss our keynote speaker Dr Rebecca Harding, presenting her Global Economic Outlook at 10:30 on Thursday 8 June. Thursday will also include Education Day as students from the area's universities will get an introduction to the world of project cargo and breakbulk with the aim to foster a new generation of industry leaders.

If you do find yourself with some free time, we encourage you to explore the city. We have put together a Rotterdam Visitors Guide filled with places to go, landmarks to see and great restaurants and bars to relax with colleagues.

Finally, I would like you say a big thank you to you all for joining us here and we wish you all the best in discovering new projects and people to build your company's business. Remember to save the date for Breakbulk Europe 2024, which will return to Rotterdam from 21st-23rd May.

Best wishes.

Jessica Dawnay
Portfolio Director

Port of Rotterdam

Dear participants of **Breakbulk Europe 2023**,

Welcome back to Breakbulk Europe and welcome back to Rotterdam, the maritime capital of Europe!

We are more than happy and proud to once again show you our city and port. Where we work together on a sustainable, smart, healthy and safe environment for our residents and customers.

As the largest seaport in Europe, we pride ourselves on the fact that no ship or cargo is too deep or too big for us. We can handle anything.

Rotterdam is a port which is also known for its **specialties** and versatility in the breakbulk sector. Industry experts are able to handle **a wide variety of products** from steel,

non-ferrous metals, forest products and heavy-lift and project cargo.

At the port, we see no limits, are straightforward and one step ahead: **Bigger. Better. Breakbulk.**

With our Port of Rotterdam Breakbulk Community, we facilitate the entire breakbulk supply chain. So, we can service you every step of the way and always deliver the right solution. We make it happen.

I hope to see you all in Ahoy and of course during the Breakbulk Boulevard networking evening in the city center of Rotterdam. **It will be a great opportunity** to meet the breakbulk community Rotterdam and the international breakbulk industry.

I look forward to meeting you June 6-8 and hope you have a very good experience (again) in Rotterdam.

THE MISSION TO SEAFARERS

The Mission to Seafarers is the chosen charity partner for Breakbulk Europe 2023. Its mission is to care for the shipping industry's most important asset: its people. Its network of ship visitors are there to offer practical, emotional and spiritual support to the men and women working at sea when they need them most. From access to WiFi, food and toiletries to free training resources to promote welfare and support their mental health, the Mission has been there to support seafarers for over 165 years, but more than ever, over these recent challenging years.

The Mission to Seafarers is one of the world's largest providers of port-based welfare services, operating in over 200 ports across 50 countries, 365 days a year

You can help the Mission to provide much needed support to the 1.6 million seafarers who are risking their lives every day to support our global economy & prosperity. At Breakbulk Europe this year, we are encouraging you to make a pledge, give something back & help support the physical & mental health of Seafarers and their families as they endure danger & isolation each day.

#pledgeforseafarers campaign

#pledgetoeducate

Pledge to take some time to learn more about the challenges that our seafarers are facing. Make the most of the free resources on offer from The Mission to Seafarers to help educate yourself and your seafarers to promote their wellbeing. Let seafarers know about the Happy at Sea index www.missiontoseafarers.org/seafarers-happiness-index

#pledgeyoursupport

Pledge your support to the wellbeing of our global seafarers. Your support can come in many different forms, from spreading the word inside your organisation, raising awareness or fundraising. Encourage seafarers to download the MtS welfare app www.app.missiontoseafarers.org

#pledgeyourtime

Pledge your time, however big or small to volunteer to a cause that supports our global seafarers.

What will your pledge be?

For more information on how you can make a difference, visit the Mission to Seafarers in the Breakbulk Futures area and look out for their session on the Breakbulk Futures Stage.

2022 KEY STATS

ship visits, encountering approximately 273,476 seafarers	39,068

Breakbulk Futures Sessions
Hall 2 2M70, Rotterdam Ahoy

WEDNESDAY, 7 JUNE 2023

The Breakbulk Main Stage will showcase business opportunities, strategy and answers to the most pressing industry questions. It will feature leading breakbulk and project executives who will provide insights into the latest business and trade intelligence, as well as delve deeper into key markets, sectors and issues affecting the whole supply chain. Join the conversation over these two days as we analyse industry megatrends, the global project market outlook and discover where the next breakbulk and project cargo business opportunities will come from.

10:55 – 11:00

Opening Remarks

Jessica Dawnay – Portfolio Director, Breakbulk Events & Media
Torben Waalkes – Global Head of Chartering, DHL Industrial Projects

11:00 – 11:20

Examining the MPV Fleet

This session will give a general overview of how today's fleet capacity will stand up to cargo demand over the next 12 months. What are the reasons for capacity issues and how will the fleet be able to manage? Where will investments be coming from? What types of ships will be the real winners and losers?

Presenter:

Peter Molloy – Multipurpose Vessel Sector Analyst, Drewry

11:20 – 12:05

Business & Market Outlook

After the highs & lows of the past two years within the breakbulk and project heavy lift sector, what might the future look like, considering the current geo-political and economic factors? Following Drewry's analysis, this session will give an overview of the current market, as well as an analysis of the real short to mid-term opportunities and threats that are facing the MPP shipping sector and how to best prepare for them.

Sponsored by AAL Shipping

Moderator:

Johan-Paul Verschuure – Project Director, Rebel

Panellists:

Peter Molloy – Multipurpose Vessel Sector Analyst, Drewry
Andy Tite – Vice President, Global Business Development & Commercial Director Industrial Projects, DHL Industrial Projects
Kyriacos Panayides – CEO, AAL Shipping
Carsten Wendt – Senior Manager – Head of Sales High & Heavy and Breakbulk Germany, Wallenius Wilhelmsen
Lars Feller – President, dship Carriers

12:20 – 13:05

Nuclear Power Projects in Europe: Infrastructure, Feasibility and Collaboration

Fuelled by the pursuit of cleaner emissions and, more recently, the geo-political impact of the Ukraine conflict, the energy transition in Europe remains a top priority. This session will focus on a nuclear power project in Poland as an example of many others in the region with a need to develop local relationships, validate proper

MAIN STAGE AGENDA

infrastructure, and ensure projects of this scale are feasible moving forward.

Moderator:

Marco Poisler – Chief Operating Officer – Global Energy & Capital Projects, UTC Overseas, Inc.

Panellists:

Wayne Trent – Head of Supply Chain, Nuclear
Lukasz Chwalczuk – Board Member, ESTA Europe Association; Managing Director, Kancelaria Prawna Iuridica; President, OSPTN Board
Glenn Mazijn – Global Segment Lead – Nuclear, Mammoet

13:20 – 14:05

Planning for the Future of Project Logistics

Having foresight is critical for any organization as it reveals opportunity and empowers innovation. This forward-thinking panel will discuss key trends, such as future-oriented work and sustainability, possible and necessary changes for more responsible business, expectations for the current decade, and best-case scenarios for project logistics in the coming years. The session will provide helpful insights on navigating the future in a so-called 'age of chaos' by addressing questions like: How might AI-chatbots and the lack of employees change the way we work? What will bring about the goal of zero carbon transport? How might modular construction transform project logistics as we know it? Join this inspiring foresight session for insight on how to co-create future scenarios for your organization.

Sponsored by the Port of San Diego

Moderator:

Sven Hermann – Managing Director, ProLog Innovation

Panellists:

Andreas Ulrich – Global Head of Logistics – Supply Chain Management, SMS Group
Thomas Dahmen – Managing Director, Siempelkamp Logistics & Service
Monika Beckfeld – Director Sales, Hansa Meyer Global
Richard Long – Senior Recruitment Consultant – Shipping, Maritime & Logistics, Helm Specialist Recruitment

14:20 – 15:05

Managing the Offshore Wind Boom

Offshore wind has been experiencing exponential growth and projects are expected to ramp up, both in Europe and beyond. Yet, fleet capacity and the availability of assets must be considered in tandem with this increased activity. Speakers in this panel will assess the readiness of the supply chain to cope with increased demand and discuss how to contain the offshore boom to operate within these capabilities.

Moderator:

Betina Holst Nørgaard – Senior Manager, Deloitte Consulting Denmark

Panellist:

Thomas Sender Mehl – SVP Global Supply Chain, General Manager, CakeBoxx Technologies
Armin Seidel – Area Sales Manager, Liebherr
Katherine Phillips – Managing Director, ABL
David Molenaar – Managing Director, Siemens Gamesa Renewable Energy B.V.
Alain Akavi – Managing Director, Coli Schiffahrt & Transport GmbH & Co KG

15:20 – 15:55

Women in Breakbulk: Building Confidence at Every Level

Discover the surprising truth behind imposter syndrome and be amazed as industry leaders from various fields share their battles with self-doubt. This thought-provoking discussion is not just for women; it's for everyone who believes in fostering empowerment and resilience in the workplace. Hear firsthand experiences and strategies to overcome self-doubt from accomplished professionals. Explore intriguing research, dispel common myths, and gain practical solutions to create a supportive culture. Together, let's unlock the power of confidence, transcend boundaries, and embrace a workplace where everyone can thrive.

Moderator:

Leslie Meredith, Marketing & Media Director, Breakbulk Events & Media

Panellists:

Femke Brenninkmeijer, CEO, NPRC

Christel Pullens, Innovation & Sustainability Director, Port XL; President, WISTA the Netherlands

Tina Benjamin-Lea, Project Logistics Director NEOM Green H2 Project, Air Products

16:10 – 16:55

Air Cargo Solutions for Project Cargo

A continuation of the conversation at last year's Breakbulk Americas, this session will build on exploring the challenges that suppliers of air transport projects are facing, particularly in a European context.

Moderator:

Thomas Müller – Director Business Development Cargo Air Charter Service

Panellist:

Pavel Kuznetsov – Head of Air Chartering, deugro

Reza Fazlollahi – Head of Sales & Contract, Airbus Beluga Transport, Airbus

Amnon Ehrlich – Director of Sales North America – Aerospace, Government, and Defense Programs, Antonov Airlines

THURSDAY, 8 JUNE 2023

10:30 – 11:00

Global Economic Outlook

Keynote speaker, Dr. Rebecca Harding's, session will look at the big factors driving economics, trade and supply chains the next 12 months. She will assess the impact of the conflict in Ukraine, look at the enduring effects on trade of commodity prices and inflation, assess the "known unknown" of China as it reopens post-pandemic, and examine at the impact that an emerging focus on sustainability will have on economic performance. As we move into the end of Q2 2023 it may seem a little late to start talking about this year's megatrends, but she will argue that the way in which supply chain resilience is beginning to dominate a geo-economics as well the trade debate, many of these themes will remain relevant into 2024 and beyond.

Speaker:

Dr. Rebecca Harding – Independent Economist, Speaker, Consultant and Entrepreneur

11:00 – 11:45

The Role of European Ports in Supply Chain Efficiency: Challenges, Opportunities & Demand

Ports are an integral part of the project cargo supply chain and, as such, changes and challenges in ports acutely affect other sectors. Currently, labour shortages, strikes, sustained increases in port charges, and inadequate port infrastructure are all impacting the wider supply chain. Collaboration across the board is required to ensure cargo movements are as efficient and predictable as possible for all parties. This session will bring together a panel from key European ports, as well as the wider supply chain, to examine the causes and possible solutions to the current challenges being faced and to map a path forward to improve efficiency across the board.

Moderator:

Lars Greiner – VP Middle East and Africa, Associate Partner, HPC Hamburg Port Consulting GmbH

Panellists:

Silvio Ferrando – Marketing Manager, Ports of Genoa

Stefan Kouwijzer – Global Supplier Management Officer, BBC Chartering GmbH

Hanna Stelzel – Head of Port & Supply Chain Performance, Port of Rotterdam Authority

Dominik Landa – Director Strategic Business Development and Intermodal of HHLA International, HHLA Hamburger Hafen und Logistik AG

12:00 – 12:30

Global Project Review

Recent economic downturn and high inflation has cast a shadow of uncertainty on upcoming investments around the globe. Our industry expert will give an overview on the current and upcoming major project developments both in Europe and worldwide, identifying investments in each sector, where the new powerhouses are, how long this status quo might last.

Speaker:

Neil Golding – Director of Market Intelligence, Energy Industries Council

12:45 – 13:30

Measuring and Pricing CO2 Emissions

In light of the recent and upcoming legislation regarding carbon emissions, the industry is under pressure to be accountable for and transparent about their carbon emissions and seek renewable alternatives. However, how can CO2 emissions be accurately measured and priced, especially with the variability of breakbulk cargo? Who should bear the burden of the cost, and will this restrict capacity? Will other markets follow suit and how will foreign policies conform? This panel will address the effects of such regulations and shed light on the implications for stakeholders.

Moderator:

Nick Lurkin – Senior Adviser Climate & Environment, Royal Association of Netherlands' Shipowners (KVRN)

Panellists:

Vilasini Krishnan – Senior Consultant, 4D Supply Chain Consulting

Rik Arends – Director Sustainable Freight Buyers Alliance, Smart Freight Centre

13:45 – 14:30

ESG Across the Supply Chain

ESG initiatives are now a critical aspect of any organisation's business model. Frameworks and requirements continue to be developed and implemented, however tensions between different criteria have led to a lack of 'best-practice' guidelines and standards in monitoring and disclosure. This session will bring together industry experts and regulatory bodies to tackle the big questions, summarising key areas of focus from reporting to accountability and helping everyone understand what ESG means for them and how they can begin making their mark.

Moderator:

Gina Panayiotou – Founder & CEO, Oceans Arena

Panellists:

Gudrun Janssens – Manager Intergovernmental Relations, EU, BIMCO

Katalin Dobranszky – Senior Director, Innovation, Finance & Fiscal Affairs, European Community Shipowners Association (ECSA)

Alex Walster – Head of ESG, Navigator Gas

Jason Williams – Global Supply Chain Lead, McDermott International Inc.

BREKbulk FUTURES AGENDA

WEDNESDAY, 7TH JUNE 2023

The Breakbulk Futures stage will bring together startups, students and industry leaders to discuss the innovations and ideas that are shaping the future of the breakbulk industry. Join these sessions to be inspired and learn how you and your company can maximise on the opportunities available in the market today.

11:00-12:00

TU Delft Student Presentations

We welcome Master's students from TU Delft as students enrolled in the Engineering Design Masters program have done an integrated design project focusing on breakbulk equipment, especially for the installation and logistics of wind farms, and port terminals. Select students will be presenting their projects during this session.

TU Delft Students

12:15-12:35

The Future of Digitalisation for Project Logistics

Join this session to hear from Ziad, the CEO of Logiswift who will discuss a case study from a solar farm project in the UAE to demonstrate how Logiswift helped to successfully manage the logistics activities for this project. Ziad will then talk through the future of digitalisation for project logistics and the potential it had in our industry moving forward.

Ziad Abourizk - Founder CEO, Logiswift

12:45-13:45

Power Hour: Innovation Across the Supply Chain

This session will provide an opportunity for attendees to hear from all of the brilliant innovative startup companies present at Breakbulk Futures. Taking only an hour out of your day, you will be inspired and learn how technology and innovation is disrupting the sector and how you might be able to streamline your operations and increase efficiency with technology.

MEET THE SPEAKERS

THURSDAY, 8 JUNE 2023

This edition of Breakbulk Europe's Education Day will inform, inspire, and entice students about what Breakbulk and Project Cargo is, how it is handled, where the cargo often moves as well as the kind of opportunities that are available in the sector. Students will receive an overview of what the business is about, experience what the building of a project requires through a case study and receive top tips for success as well as interesting career advice from industry executives.

MC: Margaret Kidd – Programme Director, Supply Chain Logistics, University of Houston

9:00 – 9:30

Registration

9:30 – 9:45

An Introduction to Breakbulk

What is break bulk and project cargo? How does it differ from other types of cargo? A leading industry expert will give a general overview and shed light on the particulars of this industry.

Speaker:

Joost Eenhuizen – Business Manager Bulk Shipping & Maritime, Port of Rotterdam

9:45 – 10:30

Breakbulk Project Case Study Workshop

A break bulk project takes planning, cooperation, and successful execution to have a successful result. Guided by the presenter, session participants will be presented with a real-life breakbulk project and be asked to analyse the risks, identify the problems, and find solutions to understand what working in the industry looks like in practice.

Speaker:

François Genevey – ITER Director, DAHER

10:45 – 11:30

Breakbulk Career Opportunities

This session will bring together various key stakeholders within the community to show the amazing opportunities that are available, both at entry-level and further. Students will learn what opportunities are available to them, what it takes to be successful, and what a career in the industry can offer them, both in the short and long term.

Moderator:

Susan Oatway – Research Analyst, Breakbulk and Project Cargo, Journal of Commerce, S&P Global

Panellists:

John Pittalis – Head of Marketing & Communications, AAL Shipping
Diana Kaufmann – President Central Europe, Global Risk Management and HR Development, deugro
Milind Balaji – Director of Global Distribution and Supply-Chain Services, Georgia-Pacific LLC
Eszter Ilyes – Global Project Logistics Tender Manager, Kuehne + Nagel

11:30 – 12:05

Skills Profiles

The project cargo industry involves a plethora of roles that each suit a variety of skillsets and personalities. To assist students in making the best choices, our speaker will assess a range of profiles and the roles that best suit them.

Speaker:

Richard Long – Senior Recruitment Consultant – Shipping, Maritime & Logistics, Helm Specialist Recruitment

12:05 – 12:45

Student Success Stories

Hear from students who have recently graduated and joined the workforce to learn about their experience to date and top tips for success when starting out.

Moderator:

Tomas Van Der Maarel – Business Development, Broekman Logistics; Jong Haventalent 2023

Panellists:

Sebastian Rostek – Operations Manager EMEA, dteq
Bjorg Sandvik Cuadrado – Junior Vessel Operator, Vitterra
Yusuf Deveci – Assistant Coordinator – Inland Ops & Procurement, Ocean Network Express (ONE)
Zara Tiedchen – Junior Voyage Operator, AAL Shipping
Kubilay Cetinkil – Project Logistics Customer Excellence Specialist, Kuehne + Nagel

13:30 – 14:30

Industry Meet & Greet

Hear from students who have recently graduated and joined the workforce to learn about their experience to date and top tips for success when starting out.

Shippers/ Cargo Owners:

Milind Balaji – Director of Global Distribution and Supply-Chain Services, Georgia-Pacific LLC
Marina Saito – Logistics Operator, Sumitomo Corporation Europe
Jamila Tourabi – Senior Logistics Operator, Sumitomo Corporation Europe

Ports & Terminals:

Gabriel Perdonsini Vieira – Chief Operating Officer, Ports of Paraná
André Luiz Pioli Bernascki – Business Director, Ports of Paraná
Greg Borossay – Principle, Maritime Business Line, Port of San Diego
Jo Van der Herten – Key Account Manager for Terminal Operators, Port of Antwerp-Bruges
Jean-Luc Helsmoortel – Key Account Manager for Shipper & Forwarders, Port of Antwerp-Bruges
Annick Dekeyser – Marketing Advisor, Port of Antwerp-Bruges
Tine Romers – HR/ Recruitment, Port of Rotterdam Authority

Freight Forwarders:

Diana Kaufmann – President Central Europe, Global Risk Management and HR Development, deugro
Wayne Holbrook – Director Global Development, Project and Energy Services, Expeditors
Alessa Rickmers – Global HR Business Partner, Project Logistics, Kuehne + Nagel
Torben Waalkes – Vice President, Global Head of Marine Chartering, DHL Industrial Projects
Andy Tite – Vice President, Global Business Development & Commercial Director Industrial Projects, DHL Industrial Projects
Michael Ruediger – Director of Industrial Projects & Energy Transport Solutions – North America, Gebrüder Weiss

Engineering/ Tech:

Sebastian Rostek – Operations Manager EMEA, dteq
Daniel Serrano – Marketing Manager, Boxxport
Vrinda Guglani – Regional Sales Manager, Boxxport

Carriers:

Janet Van Heijningen – Talent and Succession Planning Manager, Ocean Network Express (ONE)
Alexander Christiansen – SAIL Apprentice, Ocean Network Express (ONE)
Ievgenii Shchipak – Junior Technical Sales Project Manager, Wallenius Wilhelmsen
Luca Schmid – Naval Transport Engineer, Wallenius Wilhelmsen
Mirco Gomez Timmerman – Breakbulk Specialist, Mediterranean Shipping Company (Nederland) B.V.

Consultants:

Thomas Skellingsted – President, 4D Supply Chain Consulting
Lars Greiner – VP Middle East and Africa, Associate Partner, HPC Hamburg Port Consulting GmbH
Diego Athayde – Director, MSE – Naval Consultancy & Survey

14:30 – 15:30

Student Show Floor Tour

This will be an opportunity for students to tour the show floor and meet exhibitors. They will have the chance to speak with a plethora of different companies covering the entirety of the supply chain; discovering what a career in breakbulk can look like, as well as more opportunities that are out there for students. Companies who are currently recruiting will be marked on the floor map. Students who are actively seeking internship or employment opportunities should visit these stands for more information.

HOST PORT PORT OF ROTTERDAM

2B10-C11

Port of Rotterdam Authority. The aim of the Port of Rotterdam Authority is to strengthen the competitive position of the port of Rotterdam as a logistics hub for amongst others the breakbulk industry, and a world-class industrial complex in terms of both size and quality. The Port Authority is able and willing to make an impact and so it is focusing on accelerating sustainability in the port and it is a partner in the digitalization of the port and logistics chains. The Port Authority's core tasks are the sustainable development, management and operation of the port, the maintenance of the smooth and safe handling of shipping and supporting the future-resilience of the port of Rotterdam.

www.portofrotterdam.com/en

MAIN STAGE & ARCH DHL INDUSTRIAL PROJECTS

2A30-B31

DHL Industrial Projects, a unit of DHL Global Forwarding that manages complex project logistics, deep sea chartering activity and heavy-lift cargo, is launching a new digital Subcontractor Management Program to mitigate risks and ensure highest standards according to environmental and safety compliance.

BREAKBULK STUDIOS LOGISWIFT

Logiswift is creating the technology platform that simplifies Project Forwarding by connecting the logistics dots. We're setting a new standard for Project Forwarding by creating the smartest one-stop-shop solution for the industry that covers the full cargo life-cycle. Plan, optimize, collaborate, execute, analyze, and make the right decisions to adapt to unforeseen challenges. Along with, comes the real End-to-End visibility the industry is seeking for. We are the key enabler for efficient and sustainable logistics.

www.logiswift.com

EXHIBITION ARCH NIRINT SHIPPING

2D15

Nirint accommodates all types of cargo varying from containers, break bulk and rolling equipment to project- / bulk cargoes. Nirint helps its customers to achieve better results by providing local knowledge and years of experience in integrated and international Supply Chain Management. We are convinced that thinking outside the box and continuous improvement is what Nirint distinguishes from other companies. As a company we believe in genuine collaboration by creating long lasting relations through achieving added value to our customers.

HAPPY HOUR PORT OF ANTWERP-BRUGES

Antwerp-Bruges, your breakbulk home port "No size fits all. Shipping general cargo such as steel, project cargo, and forest products is a bespoke job. Thanks to its can-do attitude and the extensive experience of its many service providers, the port of Antwerp-Bruges shipped 12.7 million tons of general cargo in 2022, with an eye for quality. Handling general cargo creates lots of jobs and is a priority in Port of Antwerp-Bruges' commercial strategy.

www.portofantwerpbruges.com/en

PHOTO CONTEST AREA & SESSION PORT OF SAN DIEGO

The Port of San Diego is the nation's specialty cargo gateway to the Pacific, situated in the natural deep-water harbor of San Diego Bay. Two cargo terminals, the 96-acre Tenth Avenue Marine Terminal, and the 135-acre National City Marine Terminal, boast easy access to regional freeways, on-dock rail service, and expertise moving specialty cargo including breakbulk, project cargo, heavy lift and roll-on/roll-off cargo; refrigerated containers and perishables; and clean, dry bulk commodities. From ship to ground to market, faster. Take advantage of our Special Advantage.

MEET THE EXHIBITORS

A.P. Moller – Maersk 1E31-F30

**Maritime Transport
Denmark**

A.P. Moller – Maersk is an integrated transport and logistics company; going all the way, together, for our customers and society.

ALL THE WAY is our commitment to connect the world so that everyone has both the possibility and the ability to trade, grow and thrive. The company employs roughly 93.000 employees across operations in 130 countries.

AAL SHIPPING (AAL) 2A10-B11

**Maritime Transport
Germany**

AAL Shipping (AAL) is an award-winning project heavy lift, breakbulk, steel, dry bulk and general cargo ocean carrier. Since 1995, we have delivered solutions for dynamic industries like oil & gas, mining, energy (renewable & non), construction and agriculture. AAL operates one of the sector's largest heavy lift fleets, serving scheduled monthly liner operations between Europe, Middle East, Asia and Oceania; regular trade lane services connecting the Americas and the rest of the world; and tailor-made tramp sailings globally. With representative offices on four continents, we offer localised 24/7 customer service supported by exclusive commercial and port agents.

Abnormal Load Services –ALS 1E35-F34

**Freight Forwarder
Netherlands**

Strong understanding of the global requirements necessary to handle abnormal/ exceptional loads, break bulk/project cargo, wheeled/tracked vehicles and oversized/heavy equipment movements. ALS offers unique solutions for out of gauge/heavy lift cargo shipments

by road, rail, air and sea both nationally and internationally.

Capabilities include: vessel chartering, marine and port agency services, arranging permits, vehicle escorts, organising global container shipments, warehousing, and storage solutions. ALS' multilingual teams are ready to help and be your one point of contact. Every single cargo is precious to us.

Admaren Tech Private Limited 1M25 IT India

We are a team of engineers, software developers and animators providing products and services for the breakbulk and project cargo industry. Our primary services include CAD and Animation services such as 2D vessel templating for stowage, 3D to 2D conversion, 2D Clean up, 3D stowage visualization, 3D Lifting simulation, Transportation animation, Safety Animations etc. Our products include;

A cloud-based application for chartering, operation and engineering management

First of its kind web-based loading computer with the features to simulate crane loading and RoRo operations

Part of The Wallenius Wilhelmsen Group ds

**ADVEEZ
1J50
IT
France**

Headquartered in Toulouse (France) with an office in the USA and sales & support partnerships in the Middle East and Asia, ADVEEZ develops innovative hardware & software solutions for IoT & Safety to: Monitor and manage critical assets at seaports, airports and in cities & buildings Improve worker and user safety Build the next generation supply chain

Born from our intention to accelerate the digitization of day-to-day business, ADVEEZ simplifies the management and usage of the connected objects to bring reliable data and analysis to our customers. Our mission is to develop ADVANCED and EASY solutions by managing every step of the product life cycle.

AERTSSEN GROUP 2E50-F51

**Freight Forwarder

Cross Currents

1A53
Equipment
United States

As a progressive provider of unique products and methods for the breakbulk industry, Cross Currents 88 offers innovative products that could be of great benefit to companies in the Breakbulk industry. These products have been in use for years and have shown significant economic benefits compared to traditional rubber air bags. Come and discuss the benefits...lower cost per trip, lower acquisition costs, lower labor costs for installation, reusable and Recyclable! A new inflation system, the Yellow Box, assures consistency and maximum cargo security in the hatch. A push button process to produce the same results every time from any and every stevedore. In the container industry, our securement, which include dunnage bags, are an excellent substitute for wooden and other types of bracing.

All of these products are designed to secure cargo during transportation and prevent damage, which can be particularly important for high-value and consolidated cargo. By partnering with Cross Currents, your business could benefit from their proven track record of success through innovative products. They could help you to reduce the risk of damage to goods during transportation, which could save you money on claims and improve customer satisfaction.

DB Cargo AG **1K31** **Rail Transport** **Germany**

DB Cargo – your partner for rail transport in Europe. We take up to 22 million truck journeys off the road every year, saving around 7 million tonnes of CO2 compared to road transport. Employing some 30,000 people and active in 18 European countries and all the way to China, we are one of the leading providers of rail freight transport in Europe. DB Cargo is the only company to offer business customers from any sector rail transport across Europe from a single source, giving them access to one of the largest rail networks worldwide. Within this network, o portfolio covers block train, single wagon and combined transport products.

DB Schenker **2J60-K61** **Freight Forwarder** **Germany**

As global industries become more and more complex, industrial projects and production sites demand logistics experts

with global experience and innovative solutions. DB Schenker Global Projects & Industry Solutions (GPIS) provide that combination. With strategic bases worldwide, we cover the full range of project freight management, supply chain solutions and transportation of materials from the suppliers' point of delivery to receipt at fabrication yards, warehouses, or any other delivery/receiving locations, as required by client. Whether remote locations, diverse industries, complex schedules or engineered solutions, your point of contact for reliable solutions is DB Schenker Global Projects & Industry Solutions.

When you require fast deliveries to maintain operating sites or complex project movements to meet construction schedules, we will manage every detail to get your cargo to the right place, at the right time using all possible combinations of air, sea, land and rail – whether oversized, containerized or box-sized.

Our tailor-made solutions serve a wide range of industries, including: Infrastructure: Civil Constructions; Transportation: Rolling Stock, Railways, Subways, Aerospace; Mining: Metals, Minerals; Heavy Industry: Smelters, Steel Mills, Cement Plants, including CCS; Renewables: Solar, Wind, Hydrogen, Hydro, Waste-to-Energy, Biomass; Oil & Gas (upstream, midstream, downstream): Exploration, Drilling, LNG, Production • Chemical: Refineries, Chemical Processing, Fertilizer Plants, Petrochemical; Utilities: Power (Generation, Grids), Water Treatment, Telecommunication; Manufacturing & Production Plants: Semi-conductor, Automotive, Breweries, Textile; Government & Public Sector: Logistics support services.

DB-PRO Professional Project Logistics **1A34** **Road Transport** **Poland**

We prepare tailored solutions. Every large project is preceded by an analysis of the possibility of delivery with any possible means of transport. At the initial stage, we conduct route surveys that let us determine the transport capacity and the modifications that would be necessary. We develop road reconstruction concepts as well as strength analyses for bridges and piers.

Together with our tried and proven partners, we offer comprehensive solutions beginning with port operations, through inland waterway transport or rail transport, all the way to transshipment and road transport with the help of our fleet. Due to our location, five hundred metres from the inland port in Opole, Poland, where the largest gantry crane with a lifting capacity of 500 t is located, we regularly use inland waterway transport. It permits the transport of much larger and heavier loads than road or rail transport. We operate in all European harbours, where we have a perfectly developed network of partners. Our partner ship owners operate across all of Europe on all navigable routes such as the Odra, Vistula, the Elbe, the Rhine, the Danube, etc. With such capabilities, we are able to choose the optimum vessel for your load. Our team shall also take care of the fixing and appropriate distribution of your cargo.

DCM CONTAINERS, INDIA **1J46** **Equipment** **India**

HHLA PLT Italy S.r.l

**2C66
Ports & Terminals,
Italy**

HHLA PLT Italy is your new common user and multipurpose terminal in North Adriatic Sea: the Gateway to Central and Eastern Europe. HHLA PLT Italy terminal is strategically located in the Free Zone of Trieste Port – an area exceptionally well connected by sea, rail and road. HHLA PLT Italy common user and multipurpose terminal is the merge of the previously existing General Cargo Terminal with the newly built logistic platform, which operates RoRo, Container, General and Project Cargo since 2021. The terminal offers an in-terminal rail connection, which creates synergies among the four different traffics handled in HHLA PLT Italy. The in-terminal rail tracks are efficiently connecting the goods to their final destinations in Central and Eastern Europe. HHLA PLT Italy offers its customers a full range of services in handling local and transit goods granting flexibility, reliability and efficient customized operations.

HLI Logistics, LLC

**2K21
Freight Forwarder
United States**

HLI Logistics LLC is the independent

North American freight forwarder. Whether by land, by sea or by air, HLI offers creative, tailor-made solutions to get your cargo and project shipments to its location on time – anywhere in the world. Our team of ocean and air experts handles the safe transport of your cargo. We confidently maneuver through the most detailed of global challenges, no matter how complex. Leave worry out of the equation by taking advantage of HLI Logistics, and letting the experts handle your freight.

HLI Rail & Rigging

**1K14
Freight Forwarder
United States**

The HLI Family of companies will collect oversized and overweight cargo from anywhere in the world for delivery to destination in the USA, Mexico and Canada. HLI owns 20 and 12 axle railcars and has extensive expertise and experience in all modes of transportation throughout the USA, Mexico and Canada to deliver to the destination, including assembly and commissioning if needed. As our focus at HLI is on handling oversized and overweight cargo, we specialize in handling power and press related equipment, including assembly. HLI has added Mars Transformers to the HLI family, so we are now able to go beyond factory to foundation with power transformers. As a result, we now offer substation maintenance and the sale or rental of transformers from our inventory for anyone needing a transformer urgently.

HMM Co., Ltd., 2E30, Maritime Transport, HMM provides many types of shipping services with various vessels. Since launching our first service with three VLCCs (Very Large Crude Carriers) in 1976, HMM has substantially expanded into the world-class integrated logistics service provider by adding various types of vessels – container ships, bulk carriers, trampers, heavy lifts, and special product carriers – hence sharpening the competitive edge. As a result, HMM has gained a diverse business portfolio and structure that can

yield stable revenue despite the market change in certain fields of the shipping industry., South Korea

Höegh Autoliners

since claimed a notable market position in the European shortsea trade. From early challenges, we have learnt and now spur our ambitions to be considered a leading contestant in the segment 4,000 to 11,000 tons deadweight. Longship is a ship operator and logistics company; the company rapidly became a relevant tonnage supplier and industrial carrier in the European shortsea. The group's second decade is characterised by steady fleet modernisation with a clear commitment to sustainability and green shipping. Longship entered an extensive fleet renewal programme introducing additional size segments and low-emission propulsion systems.

Port Atlantique La Rochelle 1J21 Ports & Terminals France

The 6th largest port in France and a deep seaport on the French Atlantic coast. It deals with a versatile and diversified traffic of goods. Accompanied by high-performance operators, the Port adapts to changes by being a Logistics Hub for offshore wind energy. It takes actions to reduce CO2 by promoting modal shift by rail. Its capacities for innovation are demonstrated by the development of digital tools and the creation of a Port Innovation Operator. Accompanied by the port's businesses and communities, Port Atlantique La Rochelle aims to be responsive, sustainable and intelligent.

Port Authority of Algeciras Bay 1A21-B20 Ports & Terminals Spain

The Port of Algeciras Bay is the number four port in the EU in terms of total throughput. It is located at the Strait of Gibraltar, crossroads of the world's main shipping routes in terms of cargo transportation. The Port of Algeciras Bay, with "0" deviation from the East-West routes, is a well-established Mediterranean service port for breakbulk operations and for any kind of ship services. It is also a natural gateway for Europe, Africa and South America. In 2022, the Port of Algeciras Bay handled round 107.2 million tons for total cargo throughput and 4.8 million TEUs.

Port Authority of Castellón 1A21-B20 Ports & Terminals Spain

Port located in the Spanish Mediterranean Cost.

Port Authority of Kribi 2K71 Ports & Terminals Cameroon

Accessible all year round and located on international shipping routes, the Deepsea Port of Kribi benefits from vast natural assets, first-class infrastructures and equipment; allowing for high productivity of cargo handling from commercial vessels with large drafts. Its location, at the center of the Gulf of Guinea allows the Port of Kribi to capture not only traffic flows from and to landlocked countries, but also transshipment flows of goods from Asia and Europe. It is backed by a land reserve of more than 15000ha which provides for the extension of its current infrastructure and the accommodation of numerous logistic, economic and social projects.

Port Esbjerg 1C40 Ports & Terminals Denmark

The Port of Esbjerg is one of the Nordic's major intermodal hubs. Around 4.5 million tonnes of cargo pass through the port each year before being transported onwards by road, rail and sea. The port is directly accessible by the E20 motorway and the rail network. Esbjerg Airport is 15 minutes away by car. Additionally, the Port of Esbjerg is the leading RoRo port in Denmark. The port is connected to more than 25 ports in Northern Europe and on the Mediterranean Sea via six regular RoRo liner services.

Port Network Authority of the Ionian Sea – port of Taranto 2L61 Ports & Terminals Italy

The Port Network Authority of the Ionian Sea – Port of Taranto (PNAIS) is the governing body of the port of Taranto. Our mission is to contribute to the development of the national economy by fostering Taranto port as a Med intermodal hub for logistics and marine tourism.

Port of A Coruña 1A21-B20 Maritime Transport Spain

The Outer Port of A Coruña, deep waters and new port facilities in the Northwest of Spain, which large drafts and the great availability of land plots are its competitive advantages to turn it into a hub port for bulks, for project and oversized cargo. At the service of international maritime transport and ready to become a green port for renewables energies and boosting new business opportunities for offshore wind.

Port of Almería 1A21-B20 Ports & Terminals Spain

Port and logistics services in southeast of Spain, 187 nm East from Gibraltar strait. Ro-Ro services with Morocco and Algeria, gypsum exports, containers and general cargo. In Carboneras Port, 60 km north Almería there are room to develop new traffics and business.

Port of Amsterdam, 2E10-F11 Ports & Terminals Netherlands

BREKKBULK AMSTERDAM DISCOVER THE DIFFERENCE Discover our tailor-

made solutions for breakbulk and project cargo. With our dedicated terminals, including multiple modern all-weather terminals, various types of heavy lift cranes and world's largest sea lock we offer excellent accessibility and personal service. Discover our central location and excellent hinterland connections, by short sea, inland waterways, rail, road and air. In our port shipping lines, shippers, freight forwarders and other customers can serve their clients in a fast, efficient, reliable, and sustainable manner. And all congestion free!

Port of Aveiro
1H31
Ports & Terminals
Portugal

Port of Aveiro is the #1 Breakbulk port in Portugal. It is an industrial and modern port located in the centre of Portugal, with an excellent network of road, rail, and shortsea connections with zero congestion. Add to that, ample available space for new industries and warehouses gives Aveiro the best option to realise long-term investments. In the Port Industrial and Logistics Zone – ZALI – is one of world main producers of wind towers and offshore foundations, positioning Aveiro in the supply chain of the offshore and onshore industries.

Port of Avilés
1A21-B20
Ports & Terminals
Spain

Port of Avilés lies at the centre of the northern coast of Spain, which is a great advantage for the establishing of national traffic between the north of the Iberian Peninsula and the Mediterranean, as well as with the Canary Islands. Its position also situates it at the centre of the European Atlantic face, thus making us a geographically ideal hub for international trade, mainly with the American continent and Northern Europe. We can also count on the back-up of access points for

different means of transport, given that we dispose of excellent rail and road infrastructures, as well as aerial links, given that Asturias airport lies a mere 15 km away from port facilities.

PORT OF BARCELONA
2C50
Ports & Terminals
Spain

The Port of Barcelona is part of a unique and seamless logistics and business hub, including airport, port, logistics areas and a large urban area. It is Spain's top port for international trade: from Barcelona companies can reach a market of 400 million consumers in under 48 hours. Its area of influence stretches through the south and centre of Europe and North Africa and it is the logistics gateway linking markets as distant as the Far East and Latin America. The Port of Barcelona provides over 37,000 jobs.

Port of Cádiz
1A21-B20
Ports & Terminals
Spain

A port at the crossroads of intercontinental maritime traffic, geo-strategic location in the Strait of Gibraltar, centre of the East-West (Asia-Europe-North America) and South-North (South America-Africa-Europe) axes. It has the capacity to accommodate all types of maritime traffic. It is a multipurpose and multifunctional port, with great versatility in the handling of operations and with the most modern technology, with an efficient flow in the transit of goods. The port is adapted to current needs, with first-rate facilities and operational versatility that make it a unique port due to its diversity, versatility, multifunctionality and respect for the natural environment.

Port of Cartagena
1A21-B20
Ports & Terminals
Spain

The Port of Cartagena is located in the southeast coast of Spain, a privileged geographic location for the main cargo lines in the East-West and North-South maritime routes. It is made up of two ports, Cartagena and Escombreras, both perfectly connected with the Spanish highway and railroad networks. Cartagena handles a wide variety of cargo: break bulk, project cargo, container, perishable goods and livestock. The port is linked to the rest of the world by excellent land and sea transport networks and offers the necessary infrastructure and port facilities to provide complete logistic services.

PORT OF CEUTA
1A21-B20
Ports & Terminals
Spain

Port of Ceuta enjoys a privileged geographical situation in the Strait of

Gibraltar, has fiscal advantages and its port has a consolidated experience in passenger traffic, merchandise and bunkering. The port of Ceuta contributes significantly to the local economy, but also completes the tourist offer since its facilities are perfectly integrated into the city.

Port of Ferrol
1A21-B20
Ports & Terminals

The Ferrol-San Cibrao Port Authority is in charge of managing three main infrastructures in the northwest of the Iberian Peninsula: the inner and outer ports of Ferrol and the port of San Cibrao. The outer port of Ferrol is the most modern and has a berthing line of 1,764.3 meters and a depth of 20 meters, one of the largest in the region, this infrastructure connects the north of Galicia with the rest of the world through several weekly maritime lines.

Port of Gdynia Authority S.A. (Port Gdynia)
2E31
Ports & Terminals
Poland

Port of Gdynia is a dynamically developing Polish seaport with a convenient location in the area of Gdansk Bay. Called the "Polish window to the world". The Port of Gdynia is a universal port, one of the leading ports in the South Baltic Sea Region. It specializes in handling general cargo, mainly unitized cargo transported in containers and in a ro-ro system. An important role in the port's activity is played by well-equipped bulk terminals. The Port of Gdynia is a recognized brand in transport and logistics systems all over the world. The Port is a node of the TEN-T core network and the entry point of the Baltic-Adriatic Corridor, the extension of which connects Gdynia with Sweden via the Gdynia-Karlskrona Motorway of the Sea. The modern infrastructure of the port

and its terminals is used by the world and Europe's largest shipping operators.

Port of Gijón
1A21-B20
Ports & Terminals
Spain

Located in Asturias, a northwest Spanish region with a long-standing industrial tradition and a wide range of project cargo shippers, the port of Gijon is the ideal maritime gateway for the storage and final works (assembly, painting, tests) of oversized and heavy lift cargo, and the development of new industrial projects. More than 70 Ha of land are available, in a sheltered, easily accessible port, for vessels up to 23 meters draft. The container terminal operated by APM Terminals provides Gijon with 5 weekly services, and two RoRo ramps enhance the port opportunities.

Port of Gothenburg
2H50-J51
Ports & Terminals
Sweden

The Port of Gothenburg is the largest port in Scandinavia and the gateway to the world for Swedish industry. Breakbulk cargo is handled quickly and efficiently, regardless of whether it is high and heavy, project cargo, steel or other cargo of non-standard dimensions. Our skilled and experienced teams will ensure your breakbulk cargo is handled with utmost care and precision. On a regular basis, we handle hydropower plants, rail trucks, helicopters, generators, accommodation modules for drilling platforms and other high/wide/ heavy units. Rail tracks into our terminals, offer a sustainable connection with the hinterland. The port is a fossil free.

Port of Hamburg
1B11-C11
Ports & Terminals
Germany

The Port of Hamburg meets the demand for all kind of breakbulk cargo with its special terminals for heavy lift and project cargo as well as fruit handling, ro-ro and con-ro facilities. Terminal operators, partner ports, shipping lines and forwarding companies offer every cargo-related service and diverse expertise, including comprehensive port, warehousing and packing services, all kinds of transportation from and to the seaport hinterland, and logistics and distribution services.

Port of HaminaKotka Ltd
1G25-H24
Ports & Terminals
Finland

Finland's biggest universal port HaminaKotka serves as an important hub in Europe and in the Baltic Sea region. Regular liner services ensure quick deliveries and connections to all parts of the world. The Port of HaminaKotka caters for all types of cargo: containers, RoRo, LoLo, dry bulk, liquid bulk, gas and project shipments of all types, and provides versatile value-added services. In addition, HaminaKotka offers excellent frames for international cruise ships.

Port of Hanko
1H21-J20
Ports & Terminals
Finland

Port of Hanko is the closest Finnish port to Continental Europe, offering an extraordinary and easily reached service for international trade to and from Finland. Port of Hanko, this year celebrating 150 years, is the leading port in fast liner traffic that offers a round-the-clock service to all kinds of foreign trade. The port has a dynamic and targeted environmental policy for the years to come with a high ambition of carbon neutrality by 2024.

MEET THE EXHIBITORS

Port of Helsinki

1H21-J20

Ports & Terminals
Finland

PORT OF HELSINKI is the busiest international passenger port in Europe, and the Port of Helsinki Ltd creates a seamless framework for sea traffic to destinations such as Tallinn and Stockholm. The Port of Helsinki is also Finland's leading general port for foreign trade. In 2022, the Port's total cargo traffic was 15.2 million tonnes. Among the strengths of the port are extensive, frequent liner traffic, efficient infrastructure, good road and rail connections, and excellent services provided in cooperation with the port's business partners. Responsibility for environmentally sustainable port operations is considered to be at the core of its daily work. Together with its owner, City of Helsinki, the Port of Helsinki is committed to implementing the Carbon-neutral Helsinki 2035 action plan. These actions include e.g. equipping several additional berths with onshore power, offering auto-mooring, and extending low-emission pricing incentive programmes, among others.

Port of Huelva

1A21-B20

Ports & Terminals
Spain

Located at the South-West of Spain, with the best projection towards West Africa, America and NEU, Port of Huelva offers a comprehensive portfolio of port infrastructures, equipment and services to host almost any type of vessel, cargo and business activity, allowing to design door-to-door logistics projects based in client's satisfaction, sustainability, innovation & intramodality, to reach the efficiency and excellence in maritime and inland connectivity for the continuity and integration of global supply chains.

Port of Kokkola

1H21-J20

Ports & Terminals
Finland

Three Port Areas
The General Port, the Deep Port and the Silverstone Port form an efficient entity, and thanks to the functioning port logistics the customer can be provided cheap transport services. Handling of containers, wind turbines components and break bulk has been concentrated mainly in the General Port, and Kokkola is a recognized and useful link in the worldwide container transport network (MSC container hub). An important part of the operations in the General Port takes place in the covered All Weather Terminal, which significantly enhances the efficiency of cargo handling.

Port of Koper - Luka Koper

2M50

Ports & Terminals
Slovenia

The company Luka Koper provides port and logistics services in the port of Koper, Slovenia. The Port of Koper is a multi-purpose port, equipped and prepared for handling and warehousing all types of goods. The basic port activity is carried out at specialised terminals, which are technically and organisationally suitable for handling and warehousing of specific cargo groups.

Port of Las Palmas

1A21-B20

Ports & Terminals
Spain

The Port Authority of Las Palmas manages the main commercial ports in east Canary Islands (Las Palmas province). Port of Arrecife, Puerto del Rosario and Port of Las Palmas. This port network (Ports of Las Palmas) handles every year 30 million tons of goods, 1.3 million TEUs, and nearly 3 million passengers. More than 13k ship's calls to which we supply 2.7 million tons of bunker. The strategic location at Atlantic

crossroads between Africa, Europe and the Americas, is a key factor in the role of the Port of Las Palmas as a logistics centre for three continents.

Port of Leixões

1C21-D20

Ports & Terminals
Portugal

For its strategic location in the Northwest of the Iberian Peninsula, the Port of Leixões holds a privileged position in the European port system context. Leixões is mainly an export port, handling more than 15 million tonnes of goods and 700 thousand TEU's, and serving virtually all types of ships, cargo, as well as cruises. It has several regular line services to the main European and world ports including direct connections to Angola, Mozambique and other African countries. In total, this port exports to 184 countries, exerting influence over an area of 14 million inhabitants.

Port of Pori Ltd

1G04

Ports & Terminals
Finland

Port of Pori Ltd is a limited liability company that produces regional rental, vessel-, crane- and conveyor services. Port of Pori Ltd consists of a total of three terminals, including Mäntyluoto harbour, Tahkoluoto deep harbour and Tahkoluoto liquid bulk and chemicals harbour. Draft of the Tahkoluoto deep harbour fairway is 15.3 metres, which is one of the deepest in Finland and allows even Panamax and Capesize-ships operations in our deep harbour quay. Very short navigation along with easiest winter conditions of the area allow safe arrival at all our terminals along our excellent fairways. The port of Pori's traffic and operations focus especially on dry- and liquid bulk goods, metal processing products and raw materials, recycling economy products and green energy cargoes.

Port of Port-La Nouvelle

1D53

Ports & Terminals
France

Port-La Nouvelle is France's 1st port to be privately managed, under a very innovative public-private governance. Located on the Mediterranean, a new infrastructure (16 m water depth) is under construction. The port will increase from 60 to 210 hectares. A total of 2,200 m of quays, 4 jetties for tankers and 100 hectares of land will boost the activities. An offshore wind turbine construction site has been set up and a hydrogen production plant will be built. Port-La Nouvelle will amplify its role within the Mediterranean while being a hub of the energy transition and heavy lifts.

Port of Rauma

A full range of services for ships and goods adds to the quality of the infrastructure, a place where the port of Sète is a multipurpose logistics platform for Southern Europe. - An ideal

geographical position a maritime gateway for Mediterranean and international traffic - Excellent nautical access deep seaport to accommodate large capacity ships - multi-purpose, high ability to handle a wide range of traffic - A proactive port community, always listening to market needs - Available land capacity to support new investments - Multimodal facilities to develop rail and waterway network

Port of Seville - Seville Port Authority

1A21-B20

Ports & Terminals

The Port of Seville is the only inland seaport in Spain. Located in the main metropolitan area in the south of the country, grants access to more than one and a half million inhabitants in the immediate vicinity and in the main cargo centre south of Spain. Fully multimodal port with sea & land connections. On its 850 hectares, it has a large logistics and industrial development zone. European strategic enclave. Counts with six concession port terminals and three public quays, more than 4,000 meters of mooring, one million sqm of warehouses and a cruise terminal in the center of the city.

Port of Stockton

1H47

Ports & Terminals
United States

The Stockton Port District, more commonly known as the Port of Stockton, is a unique inland Port situated on the Delta of the San Joaquin River, within the agriculturally rich community of California's fertile San Joaquin Valley. As a California Special District and public entity, the Port offers flexible solutions for domestic and international distribution by ship, rail, or truck. Boasting world class warehouse facilities, and recent infrastructure improvements, state of the art cargo handling equipment upgrades, and offering 400+ acres of land approved for new development, Port of Stockton has

MEET THE EXHIBITORS

the capacity to meet a growing demand for efficient shipping.

Port of Tyne

1L36

Ports & Terminals
United Kingdom

Port of Tyne is a modern deep-sea port located in Northeast England that handles cargoes across five continents. Our team prides itself on our customer-centric approach, working closely with partners to find solutions that improve their supply chain and help their business grow. With top-of-the-line facilities situated on the River Tyne and served by a network of sea routes, major roads, and rail, Port of Tyne is capable of handling a wide variety of cargoes, from cars to containers, bulk goods, renewable energy, and offshore equipment. Our end-to-end solution is a one-stop shop, ensuring the secure, efficient, and safe movement of goods.

Port of Valencia

1A21-B20

Ports & Terminals
Spain

Valenciaport manages the ports of Valencia, Sagunto and Gandia, whose priority is to generate wealth and employment. The Port of Valencia is the best connected in Spain thanks to its geostrategic position in the Western Mediterranean and an extensive network of regular connections. The three ports are highly competitive, allowing time and cost savings in operations. Valenciaport manages the ports of Valencia, Sagunto and Gandia, whose priority is to generate wealth and employment. The Port of Valencia is the best connected in Spain thanks to its geostrategic position in the Western Mediterranean and an extensive network of regular connections and tramp services. The three ports are highly competitive, allowing time and cost savings in operations. With state-of-the-art infrastructure, service and technology,

the Port of Valencia specializes in container traffic and RO-RO services. The Port of Sagunto, a multipurpose port, handles general cargo, breakbulk cargo, automobiles, LNG and bulk traffic, while the Port of Gandia handles general cargo, mainly pulp and wood.

Port of Viana do Castelo

1C21-D20

Ports & Terminals
Portugal

Located in the northwest of Portugal, on the Atlantic coast, the port performs its activities on both banks of the Lima River. The Commercial port located on the left bank of the Lima river, has an installed capacity to process about 1 thousand tons of cargo/year, being accessible to ships of up to 8 metres draft and 200 metres long. It consists of two sections of the pier with a total length of 487 metres, equipped with high-capacity cranes, with a Roll-On/Roll-Off terminal and offers large areas for parking and storage of goods. It offers excellent conditions for maritime accessibility, tranquillity and shelter within the port, and a free and safe entry into the bar channel. Designed for handling different types of cargo, the current port traffic structure is predominantly composed of general break-bulk and solid bulk cargo. Over recent years, a cruise line has been calling the port, proving its ability and potential to meet the requirements of demand in this tourism market segment. The actual port of Viana do Castelo is therefore characterized by four features – commercial, industrial, fisheries and nautical sports.

Port of Vigo

1A21-B20

Ports & Terminals
Spain

Vigo is a naturally sheltered port, strategically located at the Spanish northwest and 24/7/365 operational. It is a versatile general cargo port with more than 90 maritime services directly linking

Vigo to Europe, America and Africa. The Port of Vigo is highly specialized in Ro-Ro, Container and Breakbulk traffic, and is a leading port in high added value cargo like fresh and frozen fishing, granite, metals, new cars and auto parts. Vigo is a competitive, efficient and sustainable port committed through its strategy Blue Growth Port of Vigo 2021-2027 to be a Connected, Innovative, Green and Inclusive Port following SDGs.

Ports of Spain

1A21-B20/1B25

Ports & Terminals
Spain

The strategic geographic situation of Spain, the logistics/port offering and a constant effort to respond to the needs of our customers has turned Spain into the logistics platform par excellence in Southern Europe and one of the main bases for the world's maritime routes. "Spanish Ports, specialists in all things special" is more than a slogan. Spanish ports offer solutions for all kind of goods

thanks to the 62,743 linear metres for bulk cargo, 17,272 metres dedicated to ro-ro traffic, and 36,285 metres of multi-use, served by over 200 cranes, and equipped with the latest-generation facilities that can receive and dispatch any type of good to any destination in the world. Come and visit us in Hall 1 Booth 1A21-B20 / 1B25 where Ports of Spain, including a representation of Spanish port authorities and port-logistics industry, present their unmatched offering.

Ports of Trieste and Monfalcone

2C66

Ports & Terminals
Italy

One of the key specializations of the ports of Trieste and Monfalcone involves the handling of exceptional loads, heavy lift, and breakbulk, as evidenced in their development and innovation plans. The Port Network Authority of the Eastern Adriatic Sea's policies and initiatives in terms of logistical, physical, and digital integration have encouraged the development of synergies between land and sea, and between the region and its main port. This has further consolidated the development and growth of a highly innovative steel and metalworking industrial and port system specializing in major projects.

The ports of Trieste and Monfalcone have thus developed a know-how that has been integrated into a single regional system (Friuli Venezia Giulia) and has become a strategic reference point for major international industrial firms, regardless of their proximity to embarkation points. The main goal of this system is to position itself as one of the leaders in the European logistics market for cargo/heavy lift projects, in order to meet a fast-growing and highly exacting demand.

The availability of dedicated facilities and infrastructure, of specialized and flexible services, and of highly skilled personnel

experienced in problem solving concerning complex loads allows the ports to safely and efficiently handle both the import of raw materials and semi-finished goods to be processed – which can be stocked in the port of Trieste's free zones – and the export of projects in the infrastructure, energy, architecture, and shipbuilding sectors.

Potteries Heavy Haulage

2A55

Road Transport
United Kingdom

Potteries Heavy Haulage is an established family-owned specialist heavy and abnormal transport supplier, able to move oversize cargo to all destinations within the UK and Europe. Promotion Council North Sea Port 2K30-L31 Ports & Terminals Netherlands

Strengthen port and port business position The North Sea Port Promotion Council Foundation is an initiative of the port business community. Its main objective is to strengthen the economic and social position of the port and the region. Companies and institutions that have a direct or indirect interest in that goal participate in the foundation. The promotion council is a networking organisation and business club that brings together parties involved in the port in an active and sustainable port community. The council is the port's "club house".

Promotion Council North Sea Port provides a platform for meeting, exchanging information, and conducting business. Of and for stakeholders in the port from this port community, the promotion council promotes the port both nationally and internationally as an attractive gateway to Northwest Europe that offers all necessary logistics and maritime facilities, where space is available and as the congestion-free alternative to surrounding seaports. Communicating the distinctive advantages of the port in general and the logistics and maritime services of the council's participants in particular requires constant action. Promotion Council North Sea Port is an ambassador for the port and contributes to maintaining and strengthening public support for the port and its participants' activities.

Special Transport euroExpress, s.r.o.

1A48

Road Transport
Slovakia

Special is our main domain, and that reflects on the accomplishment of every single step during the oversize and heavy cargo transportation. In a fully legal way, meeting the European standards we provide the transportation from very beginning to the successful end by issuing the permits and police, or military assistance if needed for the usage of land roads. We ensure securing the loading and unloading of the cargo and pilotage, technical vehicles for installation and removal of traffic signs and planning and verifying the route clearance due to the size of the cargo. 8 314 successfully realized projects and our 10 years of experience is a guarantee of the highest quality and most efficient posture.

We meet all of the European criteria according to the environmental protection with the most modern pilot fleet in BF2 and BF3. Our staff is well experienced and has all of the qualifications enabling the pilotage of oversize vehicles throughout the whole Europe. We cooperate with companies all around Europe but we mainly provide our services in Slovakia, Poland, the Czech Republic, Slovenia, Serbia, Austria and Germany. Our extensive knowledge and skills allow us to carry out each transport efficiently, safely, smoothly and on time with guaranteed customer satisfaction. There is no load that is heavy and big enough for us, because “No heavy, No fun.”

offering comprehensive door-to-door services tailored to customers' needs. With 38 offices in 16 countries and over 160 vetted agents around the world, our expert teams are dedicated to working closely with you to meet all of your ocean, air, rail, inland transportation, and turnkey project needs.

VALLEY GROUP

2E50-51
Road Transport
United States

For more than forty years, Valley Group has specialized in the transportation and installation of industrial machinery and power assets. With fully staffed field operations and logistics divisions, we work closely with both freight forwarders and/or owners to handle oversized and project cargo from US port inland including installation. Our installation division has handled units up to 500 US tons and our logistics division can arrange for all services including port handling, stripping, trucking, and rail. We also offer our own heavy haul trucking with trailers up to 13-axes.

Van der Vlist Transport Group

2G31
Road Transport
Netherlands

Van der Vlist is a logistic service provider with a passion for transport and technique. We are always looking for optimal solutions for our customers, underlined by our core values, integrity and transparency. A national and international dynamically operating Dutch family-owned firm with over 90 years of experience and its own culture. We provide a range of solutions that combine transport via road, sea, inland waterways, rail, and air as well as storage and technical services like inspection, assembly, and modification.

Van der Wees Transporten

2B20-C21
Maritime Transport
Netherlands

MEET THE EXHIBITORS

Van der Wees can tackle any loads that cannot be transported by road or using conventional shipping due to weight or measurements. With our extensive fleet of pontoons, tugs and pusher craft, we can handle every load.

VENICE PORT AUTHORITY

2D51

**Ports & Terminals
Italy**

The North Adriatic Sea Port System, constituted by the ports of Venice and Chioggia, boasts a strategic position at the top of the Adriatic Sea, crossed by two European Transport Corridors: the Mediterranean and the Baltic-Adriatic ones. It represents the terminal of the inland waterway crossing the Po Valley, allowing sea-river intermodality; it's also the terminal of the Motorways of the Sea of the East Mediterranean. It is able to handle any kind of cargo, thanks to a natural multipurpose vocation and consolidated know-how in different supply chains, acting as the focal point to reach the European manufacturing and final consumer markets.

Verbrugge Terminals B.V.

1J10

**Ports & Terminals
Netherlands**

Verbrugge is a leading logistics services provider with terminals in the ports of Vlissingen and Terneuzen. Verbrugge Terminals handles in Terneuzen and Vlissingen more than 14 million tonnes per year. Verbrugge Terminals focuses on a selective number of product markets: metals/lumber/steel, energy project cargo, noble bulk products and paper and wood pulp. Verbrugge also offers a wide range of key support services including short- and deep-sea chartering, port agency, cargo agency, liner agency, freight forwarding, road transportation and customs services.
