## FEATURE STORIES

### EU Space Logistics: Aiming For The Stars

Ariane 6, the new heavy-lift launch system being developed by the European Space Agency, will make its inaugural flight this year, kicking logistics on planet Earth into action.

### Nuclear Power Resurgence

Nuclear power is looking increasingly attractive to European countries keen to improve their energy security bringing new project cargo opportunities.

### ITER Milestone

The last of the largest and heaviest loads for the world's largest magnetic fusion device have made their way to the French harbor of Fos-sur-Mer. What next for this European super project?

### Hywind Tampen Test Bed

As the world's largest floating offshore wind farm, the North Sea's Hywind Tampen is proving to be a test bed for development of floating wind, exploring the use of new and larger turbines, logistics and installation methods.
