BERLIN

19-21 MAY 2026
MESSE BERLIN

Visitor Attendee Brochure

The global meeting place for the entire
electrical manufacturing value chain.

WHERE
POWER
MEETS
PROGRESS

01

A note on powering progress

For 30 years, CWIEME Berlin has been where power meets progress for the electrical manufacturing industry.

In 2026, that purpose matters more than ever. Electrification, energy efficiency and supply chain resilience are shaping every decision our industry makes. CWIEME Berlin is the one place where engineering expertise, manufacturing capability and future-focused thinking come together.

Here, progress is practical. You can meet the full value chain, see solutions side by side and have the conversations that move real projects ahead.

We look forward to welcoming you to Berlin and supporting the work you are doing across motors, transformers, generators and energy systems.

**MELISSA
MAGESTRO**
Portfolio Director,
CWIEME Berlin

02

Why attend

Move projects from idea to action

CWIEME Berlin is Where Power Meets Progress across the electrical engineering and manufacturing industry.

[GET YOUR FREE TICKET](#)

Network with industry leaders

Meet leading manufacturers, component suppliers, machinery providers and digital innovators behind the next generation of power systems, motors and components.

Find solutions to project needs

Move projects forward faster by identifying the right suppliers, technologies and partners in one place.

Gain expert insight

Hear directly from industry experts on how progress is being delivered across electrification, energy efficiency and manufacturing.

Explore tech in action

See how materials, machinery and digital tools are being applied to real-world challenges across the value chain.

03

Who's powering the industry?

5,700+

visitor footfall

490+

exhibitors

12,400+

total community footfall

85+

countries attending

69%

are working on live projects or planning future initiatives

84%

of users were satisfied or very satisfied with the quality of connections made

90+

experts who share exclusive insights across different stages

04

Hear from our past attendees and exhibitors

EXHIBITOR & SPONSOR

CWIEME Berlin is a must-attend event for us every year, as this is the place where we meet our key customers and set up networking meetings. Thanks to the big reach of CWIEME Berlin, we are able to meet new clients within our target audience.

MAYERLINE NYFFELER
Head of Marketing, PFIFFNER Group

VISITOR

This event was a great opportunity to speak about the latest developments in the energy transition and to highlight what's required from the transformer industry. I've been to CWIEME before, and this year has been especially engaging. I've already had a number of good conversations with customers.

SEBASTIAN REHKOPF
Head of Tap-Changer, Maschinenfabrik Reinhausen GmbH

VISITOR

Overall, CWIEME Berlin 2025 exceeded my expectations, both professionally and personally. The networking opportunities were outstanding, and the atmosphere encouraged meaningful collaborations.

ANASTASIA LEUTLOFF
Project, Program & Portfolio Lead,
TRUMPF Hüttinger GmbH + Co. KG

VISITOR

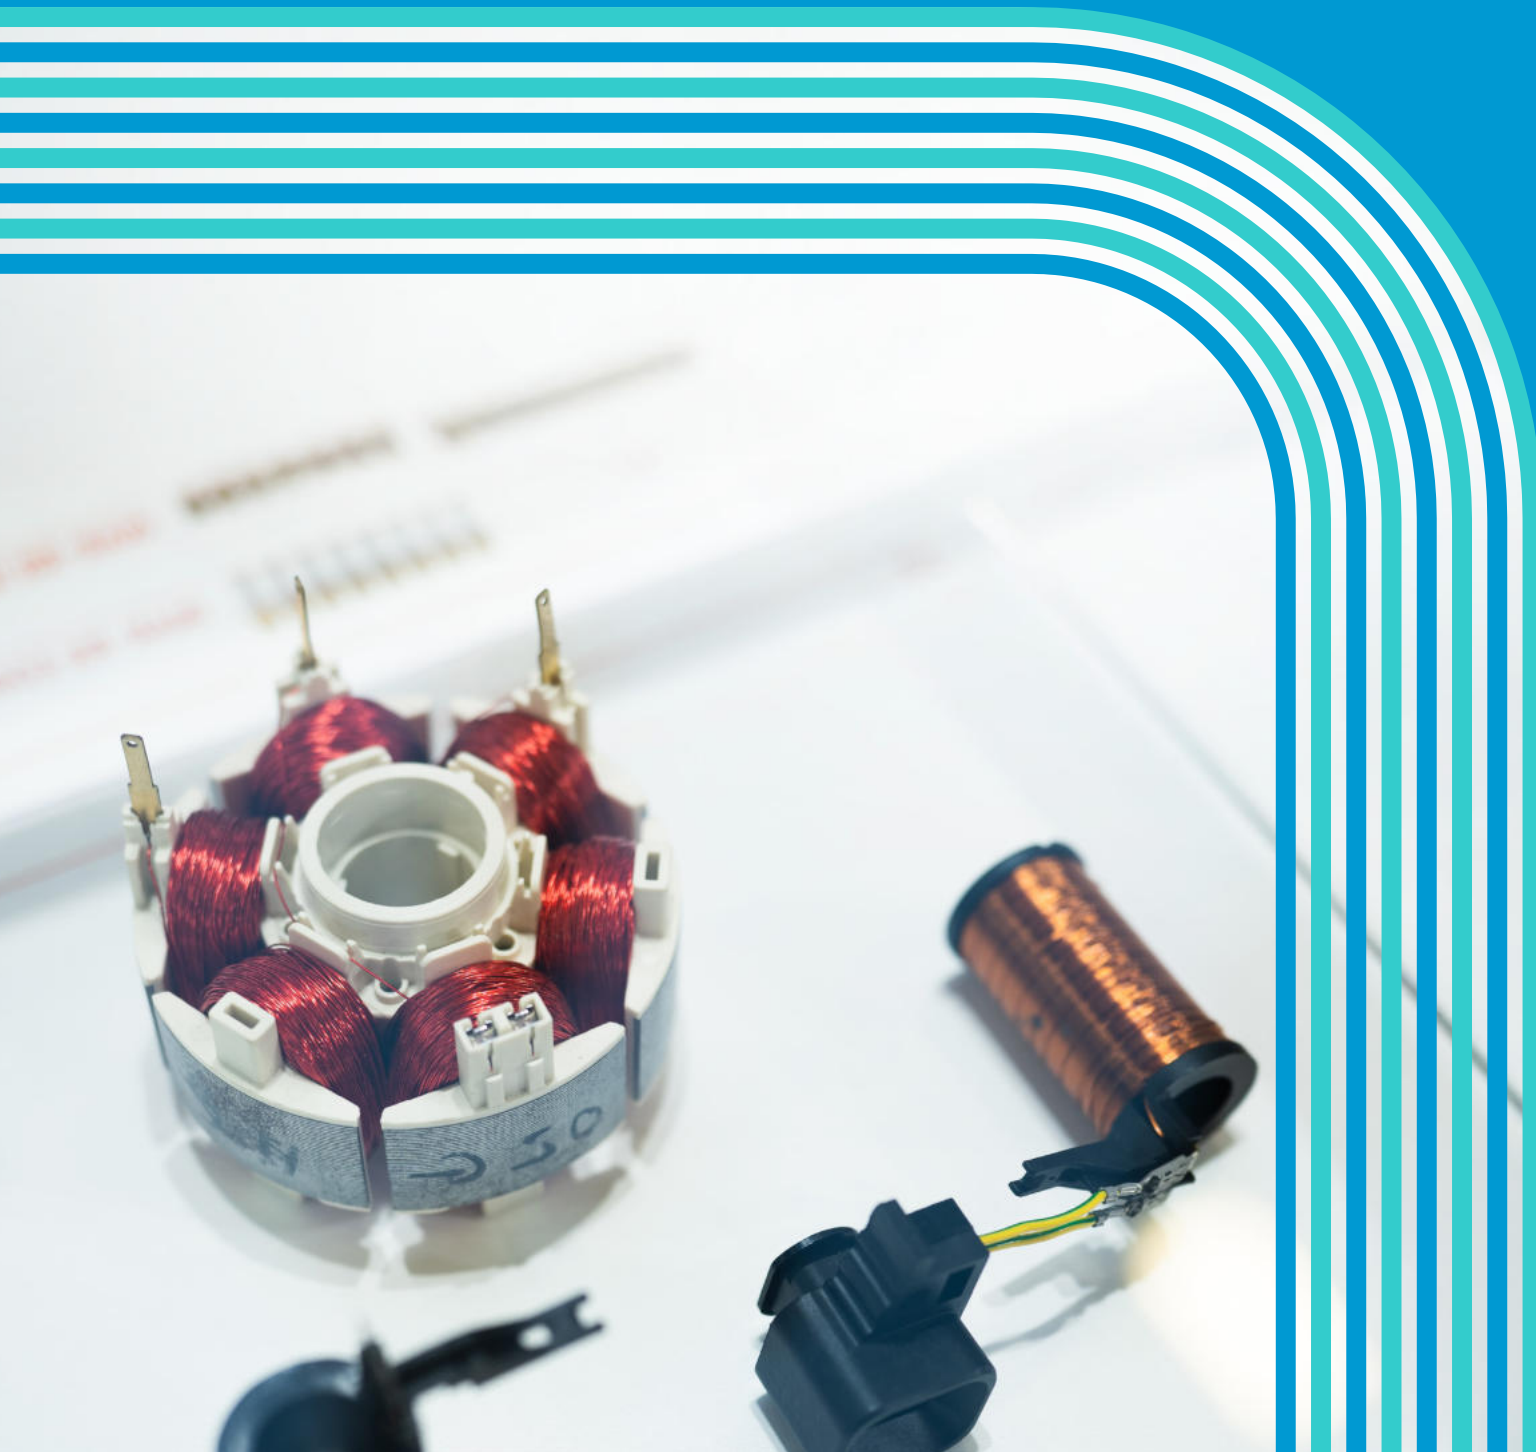

I'm always impressed with all the different companies and you know what they have to offer. We've had some very good experiences and leads and some good potential opportunities for the future.

STEVE FALL
Senior Manager, Procurement, Nidec Motor Corporation

05

New for 2026: focused platforms driving progress

CWIEME Berlin 2026 brings Where Power Meets Progress to life through three major additions that deepen technical focus and industry relevance.

Electric Motor Forum

A dedicated focal point for Europe's motor industry. Explore motor design, manufacturing, efficiency and performance through targeted sessions, expert discussion and direct access to suppliers shaping the next generation of electric motors.

EEMODS co-located with CWIEME Berlin

Energy Efficiency in Motor Driven Systems (EEMODS) joins CWIEME Berlin in 2026, bringing global researchers, policymakers and industry leaders together. This co-location connects industrial practice with policy and research, strengthening CWIEME Berlin's role as the platform for efficiency, electrification and real-world impact.

Expanded Innovation Zone

A larger, more focused Innovation Zone showcasing applied technologies across AI, monitoring, predictive maintenance, design optimisation and smart sensors. Built to help visitors identify practical solutions that support performance, efficiency and reliability.

Transmission & Distribution developments

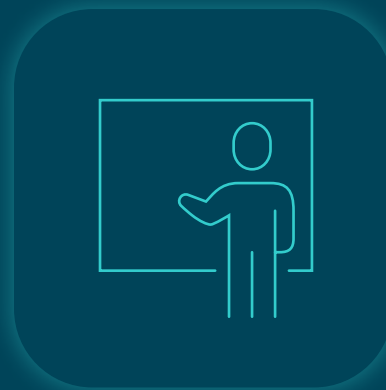

An enhanced T&D Club and a dedicated content stream in the Central Grid stage that brings utilities, TSOs, DSOs, OEMs and grid operators together to compare transformers, materials, testing and grid scale solutions side-by-side. The event will feature peer roundtables, briefings and practical sessions that link supplier capabilities to system performance, delivery and grid resilience.

06

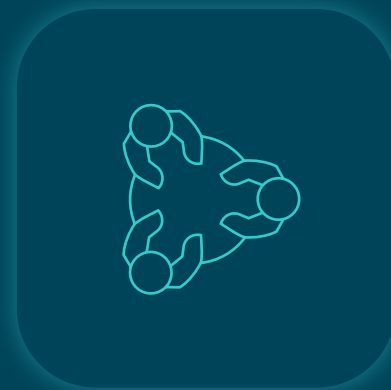

Content that matters

Gain exclusive insights from industry leaders through expert-led sessions covering cutting-edge technologies, emerging trends, and sustainability initiatives. With two dynamic stages and a stellar speaker lineup, you'll stay ahead of the curve and connect with key innovators shaping the future.

Presentations

Roundtables

Panel discussions

Interviews

Global Market Trends and Challenges

Advancements in Electrical & Mechanical Engineering and Automation

Sustainability and Energy Efficiency

Manufacturing Technologies and Innovations

Industrial AI and Digitalisation

Diversity & Inclusion - Bridging The Talent Gap

07

Meet the companies shaping progress

Plan your visit with confidence. This page highlights confirmed exhibitors you can meet on the show floor and confirmed speaking companies you can learn from on stage. If you are working on a live project, this is your shortcut to the conversations and contacts that move decisions forward.

08

Navigate with purpose

The CWIEME Berlin floorplan is designed to support you Where Power Meets Progress.

- Electric Avenue main aisle for efficient navigation
- Clear clustering of technologies and solution areas
- Dedicated spaces for innovation, learning and networking
- Easy movement between halls and feature zones

The layout is built to support better conversations, clearer comparisons and more productive outcomes.

Take the next step

Join Where Power Meets Progress

If your role involves designing, sourcing or delivering electrical manufacturing solutions, CWIEME Berlin is where power meets progress for your company.
