

Sranan Gold

Highly Prospective Targets in the Heart of Suriname's Modern-Day Gold Rush

CORPORATE PRESENTATION | OCTOBER 2025

CSE: SRAN | FSE & Tradegate: P84

Cautionary and Qualified Person Statements

Legal Disclaimer

This presentation of Sranan Gold Corp. (“Sranan” or the “Company”) is for information only and shall not constitute an offer to buy, sell, issue or subscriber for, or the solicitation of an offer to buy, sell, issue or subscribe for any securities in any jurisdiction. The information contained herein is subject to change without notice and is based on publicly available information, internally developed data and other sources. Where any opinion or belief is expressed in this presentation, it is based on the assumptions and limitations mentioned herein and is an expression of present opinion or belief only. No warranties or representations can be made as to the origin, validity, accuracy, completeness, currency or reliability of the information. The Company disclaims and excludes all liability (to the extent permitted by law) for losses, claims, damages, demands, costs and expenses of whatever nature arising in any way out of or in connection with the information in this presentation, its accuracy, completeness or by reason of reliance by any person on any of it. This presentation should not be construed as legal, financial or tax advice to any individual, as each individual’s circumstances are different. Readers should consult with their own professional advisors regarding their particular circumstances. There are certain risks inherent in an investment in the securities of the Company that prospective investors should carefully consider before investing in the securities of the Company.

Forward Looking Statements

This presentation contains “forward-looking information” within the meaning of applicable Canadian securities legislation and “forward-looking statements” within the meaning of applicable United States securities legislation, together, “forward-looking statements”. Such forward-looking statements contain known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements, or developments within our industry, to differ materially from the anticipated results, performance, or achievements expressed or implied by such forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects”, “aims”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential”, and similar expressions, or that conditions “will”, “would”, “may”, “could”, or “should” occur. Forward-looking statements included in this presentation include, but are not limited to: statements with respect to the Company’s expectations regarding drilling and exploration activities on properties in which the Company has or may acquire an interest; and information with respect to the Company’s continued exploration programs (including size and budget). Information inferred from the interpretation of exploration results and information concerning potential mineralization may also be deemed to be forward-looking statements, as such information constitutes a prediction of what might be found to be present if a project is actually developed. There can be no assurance that such statements will prove to be accurate. Actual results and future events may differ materially from those anticipated in such statements and readers are cautioned not to place undue reliance on these forward looking statements that speak only as of their respective dates. Important factors that could cause actual results to differ materially from the Company’s expectations could include among others: risks related to fluctuations in mineral prices; uncertainties related to raising sufficient financing to fund planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical, or other factors; risks associated with emerging and developing markets; the possibility that results of work will not fulfill expectations and realize the perceived potential of the properties in question; political uncertainty and other risks of doing business in Suriname; the Company’s inability to obtain property rights and interests as currently proposed or at all; uncertainties in the estimation of any potential future mineral resources or reserves; the possibility that required permits may not be obtained in a timely manner or at all; the possibility that capital and exploration costs may be higher than estimated and may preclude or render future exploration and development uneconomic; risk of accidents, equipment breakdowns or labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or other unanticipated expenses in work programs; the risk of environmental contamination or damage resulting from the Company’s operations; risks associated with title to mineral properties; risk associated with the COVID-19 pandemic; and other risks and uncertainties discussed elsewhere in the Company’s documents made publicly available from time to time. These statements are based on a number of assumptions; including assumptions regarding general market conditions, the availability of financing for proposed transactions and programs on reasonable terms, and the ability of outside service providers to deliver services in a satisfactory and timely manner. Forward-looking statements are based on the beliefs, estimates, and opinions of the Company’s management on the date the statements are made. Except as expressly required by applicable securities laws the Company undertakes no obligation to update these forward-looking statements in the event that managements beliefs, estimates, opinions or other factors, should change.

Public Data

This presentation also contains or references certain industry data which is based upon information from independent industry publications, market research, analyst reports and surveys and other publicly available sources. Although the Company believes these sources to be generally reliable, such information is subject to interpretation and cannot be verified with complete certainty due to limits on the availability and reliability of raw data, the voluntary nature of the data gathering process and other inherent limitations and uncertainties. The Company has not independently verified any of the data from third party sources referred to in this presentation and accordingly, the accuracy and completeness of such data is not guaranteed.

Qualified Person

Dr. Dennis J. LaPoint, Ph.D., P.Geo. Sranan’s EVP Exploration & Corporate Development, and a “qualified person” as defined under National Instrument 43-101, has reviewed and approved the scientific and technical information in this presentation. Dr. LaPoint has verified the data disclosed in this presentation and no limitations were imposed on his verification process.

Why Invest in Sranan Gold?

The Tapanahony Project in Suriname has excellent potential to become a **multimillion-ounce gold deposit**

Large land package of 29,000 hectares

There is significant production from saprolite by local miners along a 4.5-kilometre trend, **where several areas of mining have been opened**

Results from previous drilling and local mining along strike **underscore resource potential**

Ongoing drilling and trenching program at Randy's Pit trend at the Tapanahony Project

2025 sampling resulted in assays as **high as 108 grams/tonne and 84 grams/tonne gold**

Management and technical team with **significant in-country experience** and success

Located in a **mining-friendly jurisdiction**

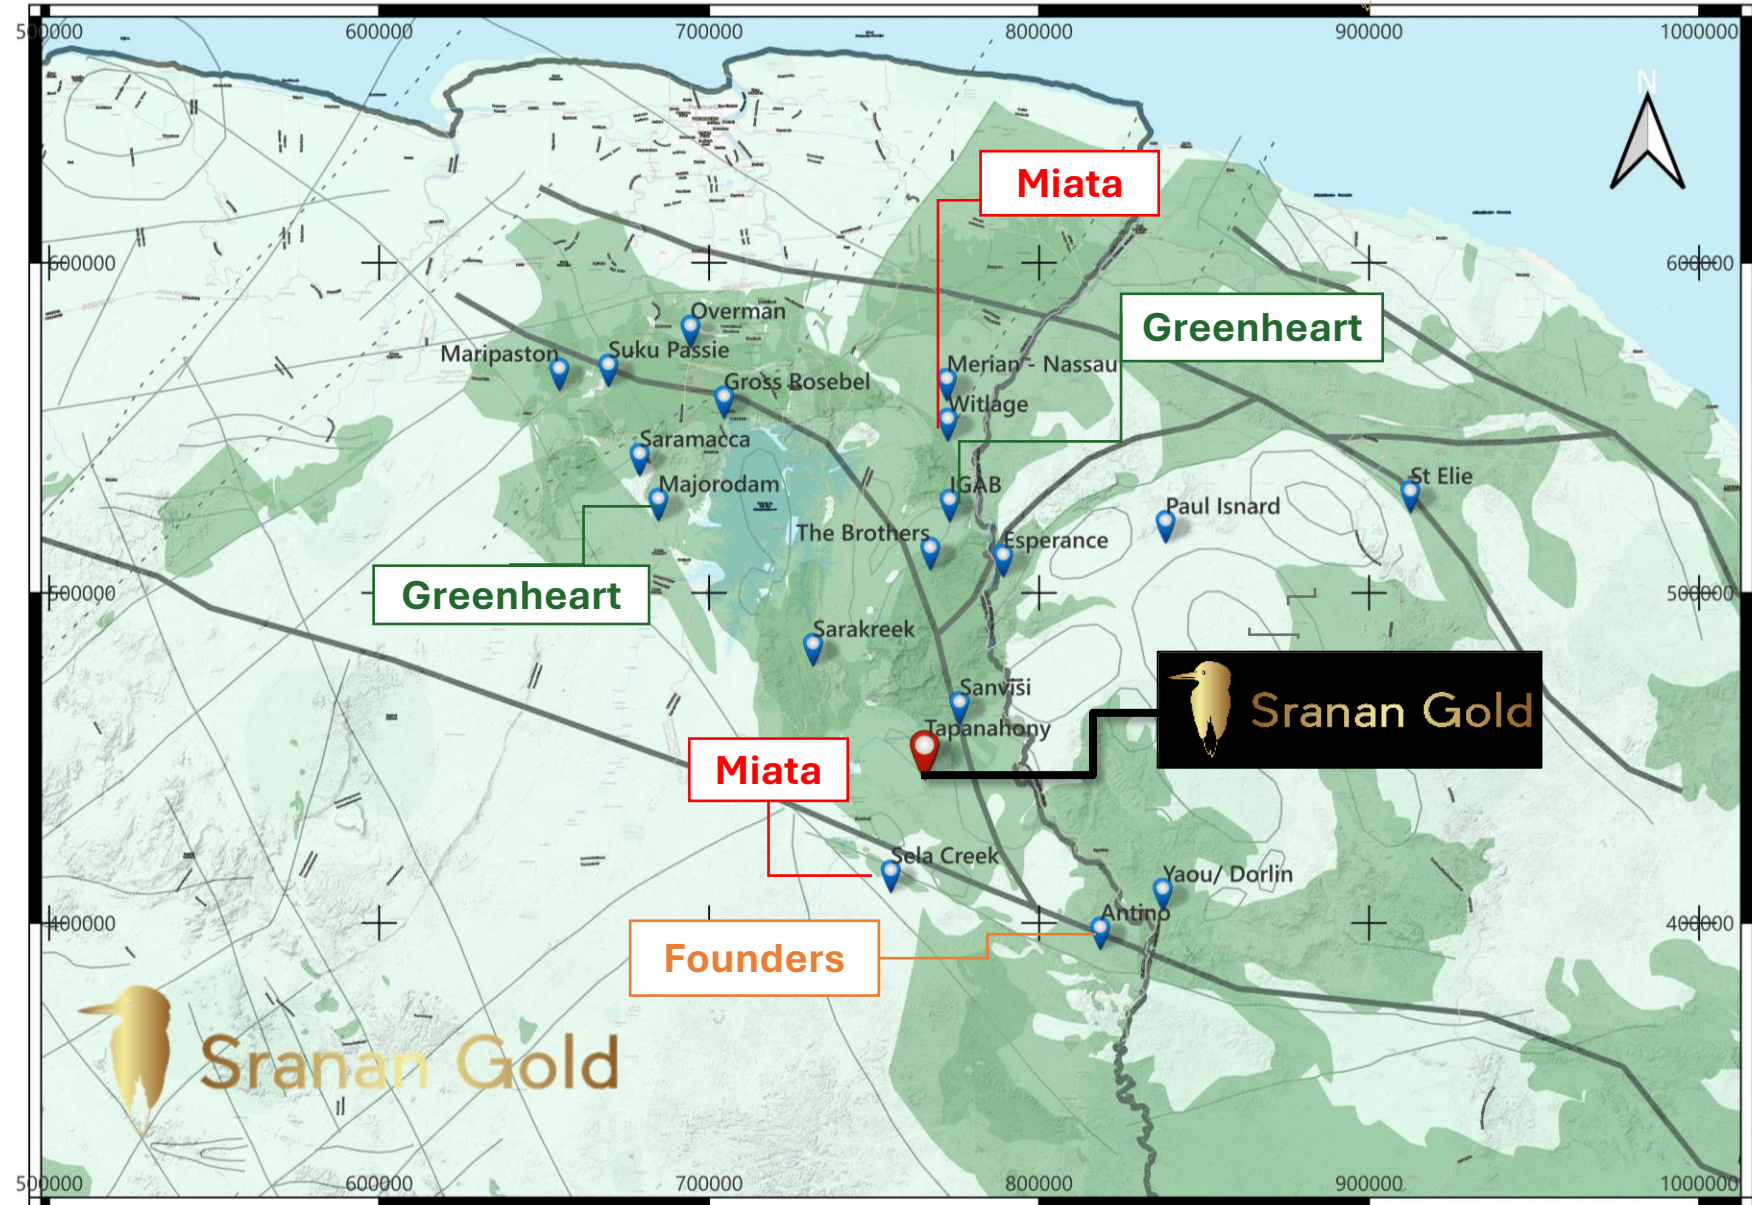

Site access via river and air

Sample collected from the Tapanahony Project's Poeketi Pit by concession holder in 2021

Suriname and Guiana Shield

- The Guiana Shield is a world-class gold belt, hosting 15 multimillion-ounce gold mines.
- There are currently two significant gold mines in Suriname:
 - **MERIAN MINE (Newmont)**
 - Production started in 2016
 - 7 million ounces gold
 - Discovered by LaPoint in 2003
 - **ROSEBEL MINE (now Zijin)**
 - Production started in 2004 by Cambior then Iamgold
 - 13.7 million ounces gold
 - Regional exploration started by LaPoint. Bhoelan involved in resource development at the Saramacca mine.

Experienced Technical Team is Positioned to Advance the Tapanahony Project

- ❁ Sranan Gold's technical team is led by Dr. Dennis LaPoint who managed a team of Suriname geologists that discovered the tier one Merian Mine (now Newmont) in Suriname in 2002. Dr. LaPoint also oversaw discoveries at Rosebel (now Zijin) in Suriname, and Omai Gold Mines in Guyana.
- ❁ Rayiez Bhoelan is a Surinamese geologist experienced in drilling, structural understanding of ore controls, and regolith development for understanding and defining mineralization. He has worked at Rosebel (Saramacca mine), and with Dr. LaPoint at Omai Gold Mines, and other drilling projects in Suriname. Most recently he worked at Founders Metals.
- ❁ Oscar Louzada has been active in Suriname for 12 years and has brought two projects (Sela Kriki and Nassau – now owned by Miata Metals) to IPO.

An Introduction to the Tapanahony Project

- The 29,000-hectare Tapanahony Project covers one of the oldest and largest small-scale mining areas in Suriname.
- Active mining by locals has helped identify exploration targets.
- Significant production of gold from saprolite by local miners.
- In 2011-2012, Iamgold drilled a target defined by panning and auger sampling and identified gold mineralization over a strike length of over 600 metres.
- Small-scale mining is ongoing on and along the Poeketi-Randy pit trend that is the initial focus of drilling.
- Additional exploration targets have been identified by small-scale miners, geophysics, Lidar and geochemical sampling.

Exploration History of the Tapanahony Project

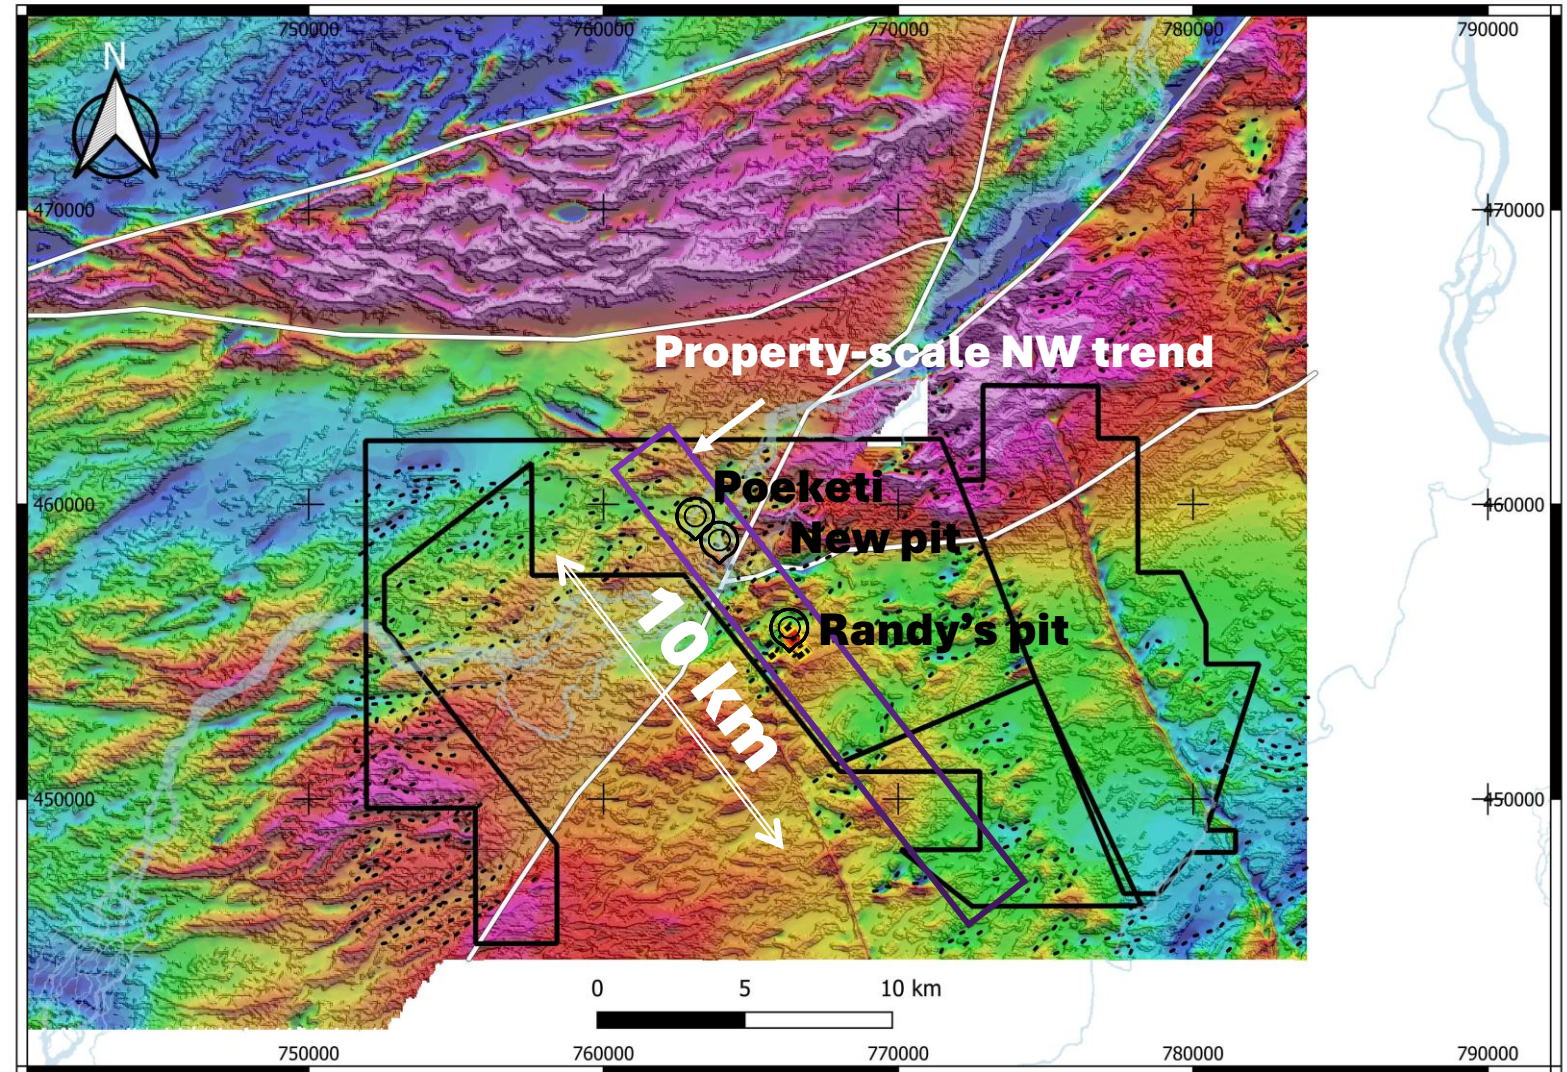

Drilling by lamgold 2011

**Over US\$10 million
has been spent on
exploration at
Tapanahony**

1980s	1993-1997	2008-2012	2020-2021	2024
United Nation Revolving Fund for Natural Resources (UNRF) supported drainage and soil geochemistry studies, which reported elevated gold values in soils (>100 ppb and locally >1,000 ppb gold) at Tapanahony	Golden Star Resources conducted exploration with a pan sampling program, 1-metre shallow auger holes, followed by deep auger holes	lamgold conducted multi phase exploration program culminating with drill program yielding positive results	Concession owner starts mining saprolite and commissions 43-101 Technical Report	Sranan Gold enters into agreement with concession owner

Regional Setting from Aero-magnetic Surveys

- Large-scale apparent dextral fault zone offsetting the magnetic high sedimentary dominant package.
- Large-scale litho-structural contacts are displaced.
- Geology within the volcano-sedimentary rocks shows significant 'ground preparation'.
- NW striking property-scale trend is cross-cut by penetrative NE-SW striking fabrics that were subsequently crenulated by a later deformation event, which creates a favourable environment for deposition of gold mineralization.
- **Excellent ground preparation for high-grade gold deposits.**

Historical Pan Data Sampled Prior to Current Small-Scale Mining

- ☉ Gold panning is a valuable exploration tool in areas prior to small-scale gold mining.
- ☉ At Tapanahony, there are multiple parallel gold trends identified that follow structures favourable for gold.
- ☉ Initial focus is on Poeketi-Randy trend where drilling by lamgold occurred in 2011-2012. Small-scale mining continues.

Exploration Priorities at Tapanahony

- 2025 drilling program to evaluate Poeketi-Randy trend.
- Gold-bearing structural trend still open along strike.
- Further develop other targets based on historical lamgold data, field review, and Lidar surveys.
- Evaluate areas where there is ongoing small-scale mining and no prior exploration.
- Acquire new adjoining concessions with positive results.
- Evaluate additional properties for potential new acquisitions in Suriname.

Poeketi-Randy Trend Sampling to Generate Drill Targets

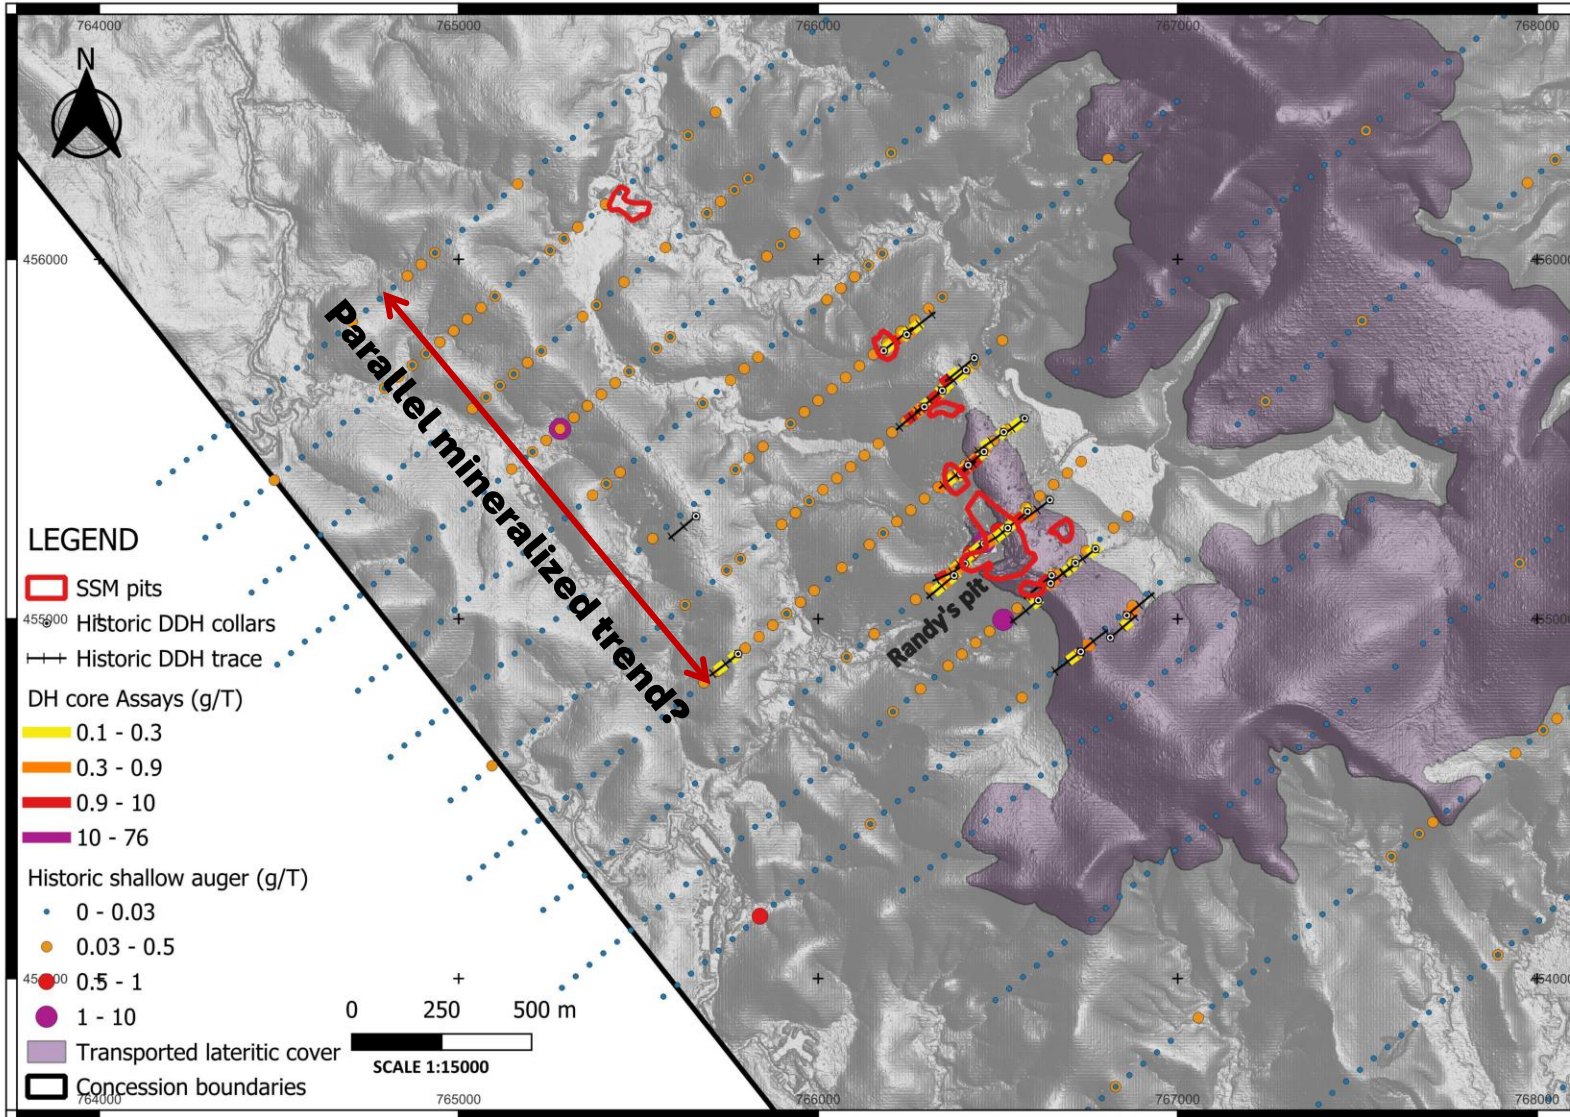

Historical Diamond Core Drilling at the Randy Pit

- ⦿ The small-scale mine is named in honor of Randy Simpson who contracted drilling for lamgold.
- ⦿ Shear trend (north-south) differs from foliation trend (northwest).

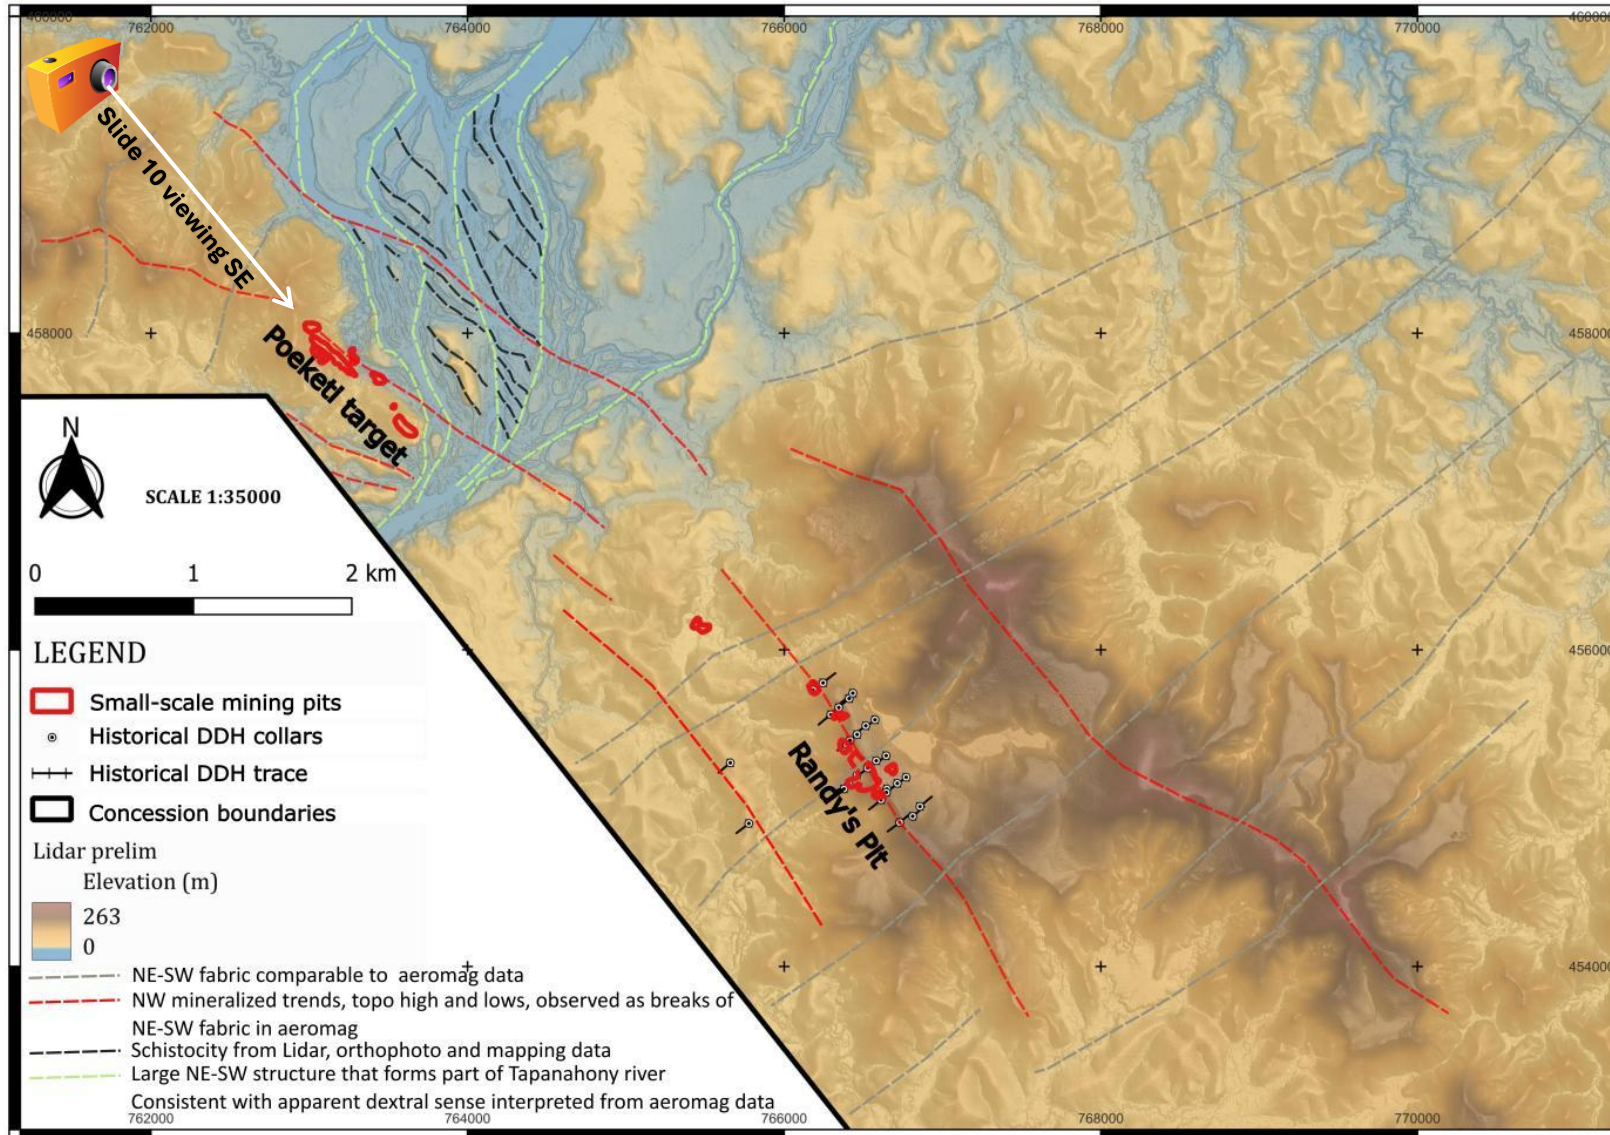

*lamgold drilled 4,000 m prior to current mining operation.
Mining has proven invaluable to new interpretations due to
access of more data.*

Lidar Suggests Three Parallel Zones of Mineralization Potentially Extending the Randy Trend

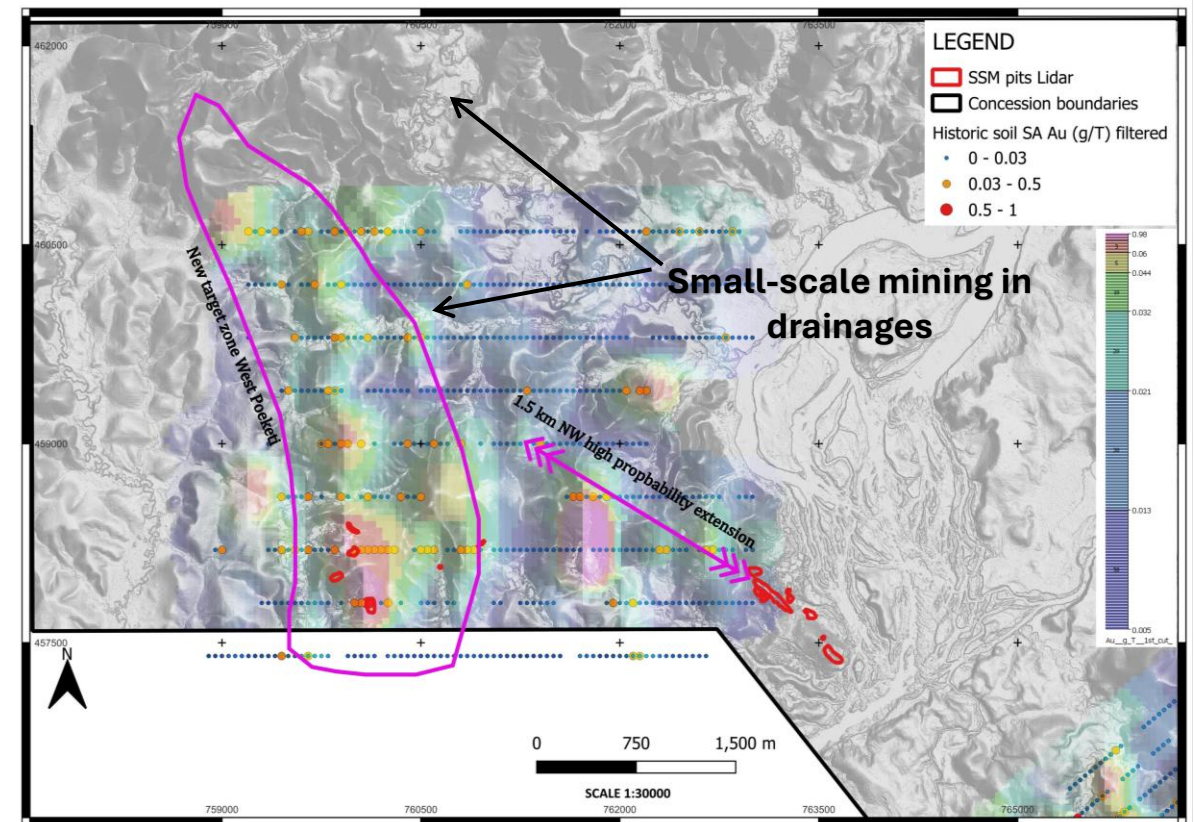

- Lidar allows for high resolution visualization of possible lateritic terraces.
- Known in Suriname to cover mineralization.
- Formed by ancient drainages and valleys and undergo topographic inversion.
- Note: correlation of this high elevation terrace with absence of anomalies.

Poeketi-Randy Gold Trend is One Target on a Major Structural Trend

- ☉ The mineralized trend postdates, cross cuts and locally deforms large-scale apparent dextral structure (slide 8).
- ☉ These deformations are well visible in Lidar data as proximal to the mineralized trend; the islands and the river are smaller and parallel to the NW-SE mineralized corridor.

New Consistent Targets Confirmed in Western Lobe of Concession

- West and NW of Poeketi, roughness of new Lidar confirmed contact zone with granite body.
- Volcanic-sedimentary zone proximal to contact show consistent 3km arc of of soil anomalies, small-scale-mining workings and pits (soil grid shows filtered-out possible transported lateritic terraces from slide 14).
- Filtered soil anomaly also shows high probability NW continuation of Poeketi for 1.5km.

Priority Exploration Targets for 10,000-Metre Drill Program

- Randy's Pit is the first priority for drilling, which is based on historical drilling by lamgold and later mining by local miners.
- Initial drill sites have been selected for up to 6,000 metres of drilling at Randy's Pit and Poeketi pits area.
- Each of the target areas has been identified by a combination Lidar survey, geophysics, geological interpretation, exploration data from previous operators, fieldwork, and most importantly, local mining activity.

Mapping at Randy's Pit

Randy's Pit, the new shafts, and location of high-grade samples.

- ❁ Randy's Pit has been mapped.
- ❁ Sheared veins within shafts show NW veins dipping west.
- ❁ Data from November 2024 shows NS shear fabric.
- ❁ Complex anastomosing and/or conjugate sets.
- ❁ Optimal drilling orientation is important.
- ❁ Earthworks and trenching with 500m strike north and southward, and parallel zones ongoing.

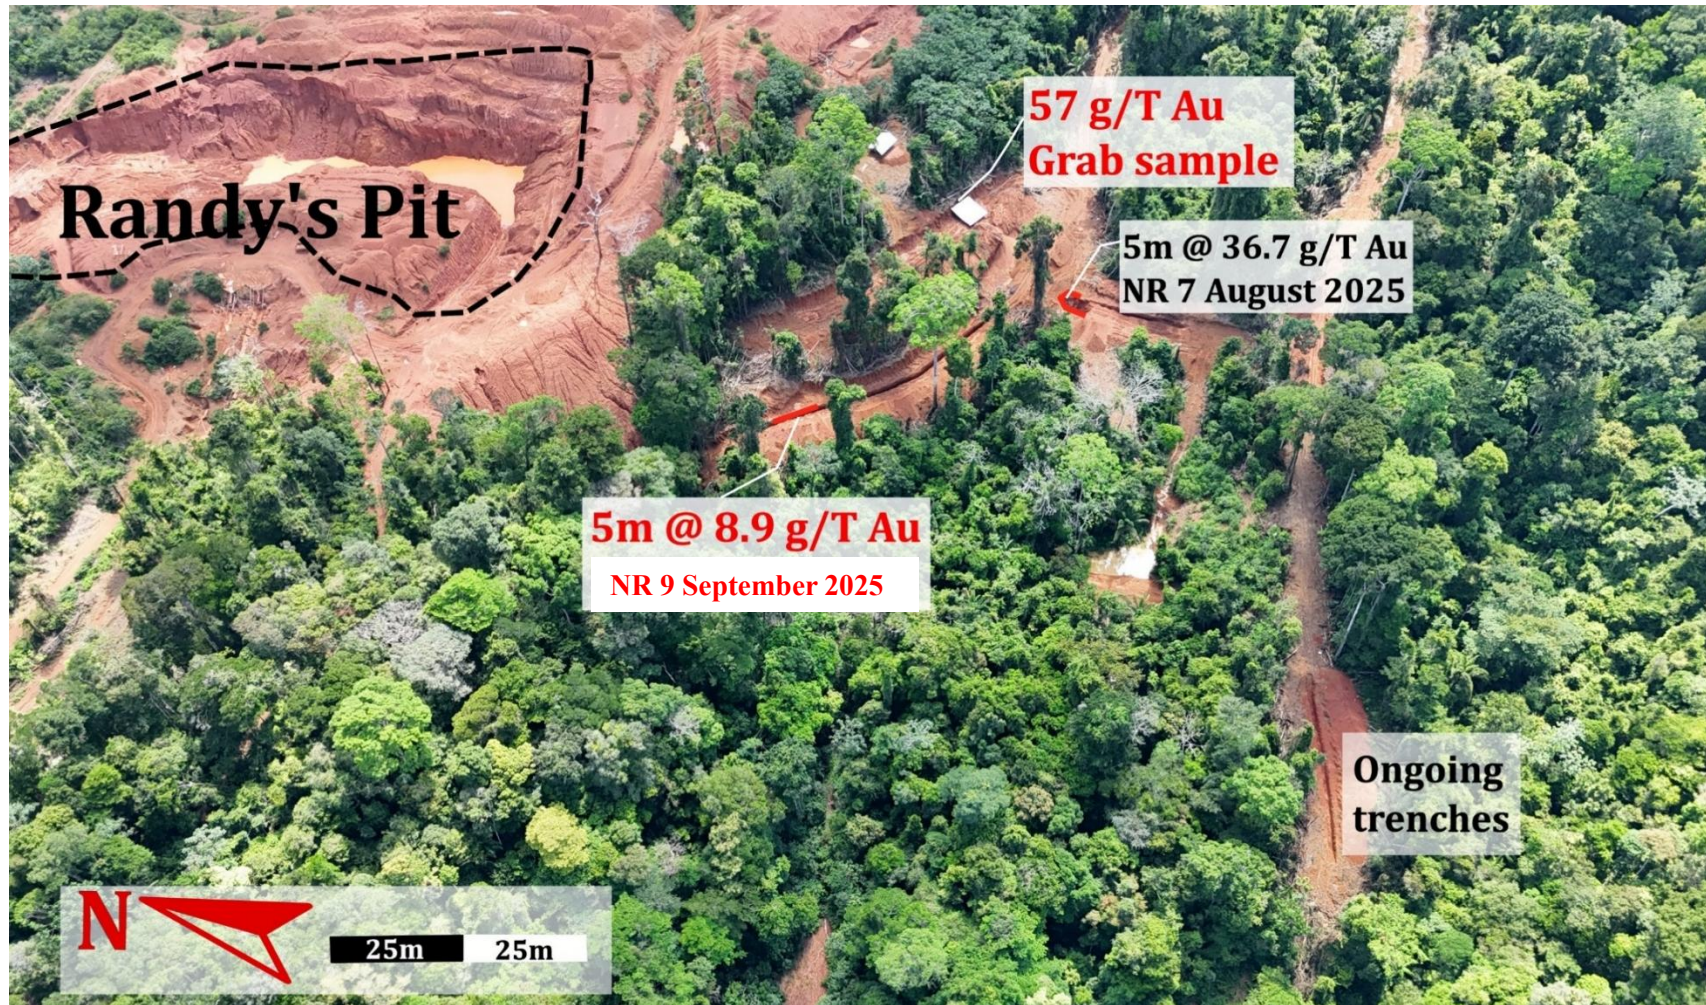

Initial Drilling and Near-term Exploration at Randy's Target

Drone image looking north showing hole 25RADD-001 in relation to channel 25RACH-001 and the shafts within the north end of Randy's Pit.

- Grab samples and rock chips at Randy's Pit UG workings show grades ranging from 1g/t Au to 76.6 g/t Au.
- In September 2025, Sranan intersected 11.5 metres grading 3.64 g/t Au in saprolite from an initial drill hole at Randy's Pit.
- Drilling and near-target trenching to occur concurrently.

Ongoing Trenching Program Expanded Randy Trend

Drone image looking down eastward showing ongoing trenching on the Randy trend.

- High-grade trench results include 8.9 g/t Au over 5 metres, and grab sample of 57 g/t Au.
- Trenching is being used to extend mineralization at Randy's Pit as well as the area of historical drilling by lamgold.
- Mineralized trend at Randy's Pit extended 150m to south.
- Initial trenches show sheared volcano-sedimentary country rock hosting sheared porphyritic and granitic intrusions which host gold in transposed sugary quartz veins and veinlets.

Planned Exploration Program

Sranan Gold's experienced local technical team is focused on discovery.

PHASE 1

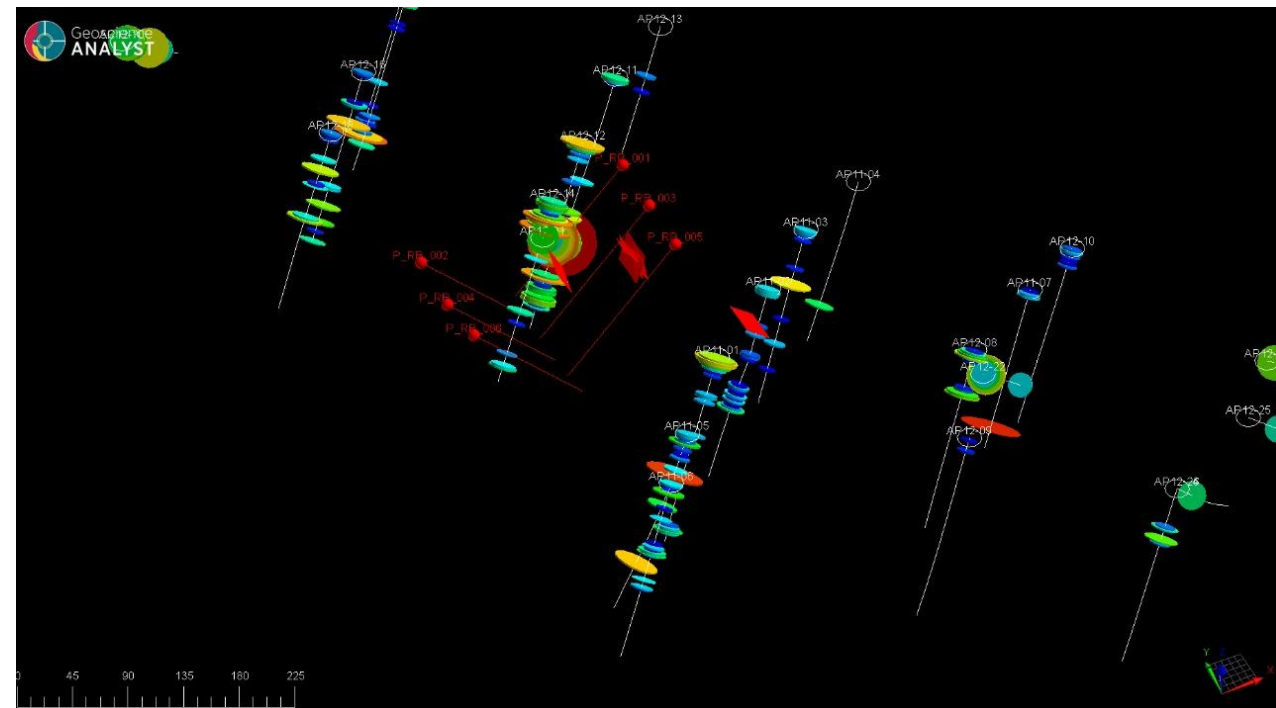

- 10,000-metre drill program at the Poeketi-Randy Gold Trend
- Sampling and mapping near areas of small-scale mining
- Build experienced and motivated team of Suriname personnel
- Construct camp for drilling program
- Develop logistical access (including existing airstrip)
- Build community relations

PHASE 2

- Extend trends seen in small-scale mining and historical panning and auger sampling

PHASE 3

- Acquire additional concessions surrounding Tapanahony from local owners and evaluate

Corporate Information

Share Structure (as at July 11, 2025)

Issued & outstanding	60,384,001
Options	7,590,000
Warrants (includes Agents/Finders' Warrants)	1,246,673

Shareholders (as at July 2025)

Management

Oscar Louzada
CEO & DIRECTOR

- Over 25 years' experience in the financial services sector working for Beeson Gregory (Investec) and Canaccord Genuity, the leading Canadian independent natural resources investment bank
- As part of Canaccord's equity sales team, he helped finance numerous exploration and development companies in the natural resources sector with a particular focus on South America, Central Asia, Africa and Europe
- Involved as a principal of three natural resources companies ranging from pure exploration in Suriname gold exploration company Sumin Resources Limited to production of fertilizer (Uzbekistan) and an 8,000tpa copper cathode production company in the US (Idaho)
- Experience as executive team and board member responsible for business development and investor relations
- Fluent in Dutch, the primary language of Suriname, and has been active in Suriname for the last 12 years

Dr. Dennis LaPoint
EVP EXPLORATION &
CORPORATE DEVELOPMENT

- Managed exploration programs in Suriname since 1999
- Initiated exploration program in 2000 and led the Suriname team that discovered the Merian Mine for Alcoa in 2003 (referred to as Nassau gold deposit for Suralco)
- From 2004 to 2007, he was employed by Cambior as Exploration Manager for Suriname and later for Iamgold
- President and owner of Appalachian Resources LLC, focusing on project management and development in Suriname, the United States, Serbia, Panama, Belize and Guyana
- Served as Director, VP Exploration and COO for various private and public companies. Most recently, he was VP Exploration for Omai Gold Mines in Guyana
- Actively serving on the North Carolina Board for Licensing Geologists
- Serves on the national board, ASBOG, on the Council of Examinators (COE) and was awarded the Sherman Award in 2022 for his service
- Teaches in the Masters Program at the Anton de Kom university of Suriname

Rayiez Bhoelan
VP OF EXPLORATION

- Experienced exploration geologist with over a decade in mining and metals
- Formerly responsible for driving greenfield exploration, geochemistry, and field mapping for Iamgold's Suriname regional exploration
- Key team member at Iamgold's Pikin Saramacca project; fast-tracked exploration towards 1.5 million ounces of contained gold in proven and probable mineral reserves, and contributed to the understanding of the regolith
- Held senior roles in the Guiana Shield with Omai Gold Mines and other companies, specializing in structural controls of complex orogenic gold deposits
- Well versed in geochemical exploration in humid tropics, specializing in mapping weathered rocks and regolith landscapes
- Former senior consulting geologist at Founder Metals Inc. and the silica sand industry
- Part-time lecturer in geochemistry at Anton de Kom University of Suriname

John Williamson CHAIRMAN

- A professional geologist and over his 35-year career he has collaborated with and led industry geoscientists and capital markets professionals on numerous successful ventures
- Led the raising of nearly \$1 billion in capital, the discovery and/or growth of at least 10 million ounces of gold on 3 continents, as well as gold, copper and nickel mining projects
- On more than one occasion his team's efforts have been recognized for excellence by being named to the TSX Venture 50™
- Involved with the founding and growth of Founders Metals Inc., where he was the co-founder, and initial CEO

Mario Stifano DIRECTOR & CHAIR OF AUDIT COMMITTEE

- A seasoned mining executive and Chartered Professional Accountant with 25 years of experience working with exploration, development and producing mining companies
- Currently the CEO of Galantas Gold and Executive Chairman of Doré Copper Mining Corp.
- Held a number of senior executive positions including Chief Executive Officer of Cordoba Minerals Corp., Executive Chairman with Mega Precious Metals Inc., Vice President and Chief Financial Officer with Lake Shore Gold Corp Inc., and Vice President and Chief Financial Officer of Ivernia Inc.
- Instrumental in raising over \$700 million to explore and fund mining projects, and notably led the team that acquired, financed and listed the historic Omai Mine in Guyana in 2020

Oscar Louzada DIRECTOR & CEO

- Over 25 years' experience in the financial services sector working for Beeson Gregory (Investec) and Canaccord Genuity, the leading Canadian independent natural resources investment bank
- See full bio on previous page*

John Alcock DIRECTOR & CFO

- Over 30 years' experience as an accounting and financial professional, and as an investor in the junior mining space
- A Chartered Professional Accountant and currently serves on the board of Altiplano Metals

Ron Shenton DIRECTOR

- Worked in the capital markets for 40 years; began his career as an investment advisor at a national brokerage firm, before moving to a regional one
- Founder of several public companies, acted as CEO, served as a director, and performed the roles of IR and PR, along with raising capital. While the majority of the companies have been in mining exploration, he has worked in the biotech, cyber security, technology, and oil and gas sectors.
