ELECTRICITY

(prices for the duration of the exhibition)

	For space only sites	For equipped stands	Total EUR
2kW	EUR 430	EUR 450	
5kW	EUR 645	EUR 710	
10kW	EUR 940	EUR 1010	
20kW	EUR 1480	EUR 1490	
40kW	EUR 2290	EUR 2355	

Connection of electric supply to stands should be done by exhibitors themselves (or their stand builders) in observation of the Requirements for electrical and technical work and for those carrying it out.

Stands must be equipped with a fuse box, and a cable corresponding to the section load (at least 30m in length) must be supplied from the stand to the power source. Direct connection of exhibits to power sources in the pavilion (machine tools, industrial items) is allowed if the requirements above are followed. In this case, power supply should be ordered for each exhibit separately.

- Power supply points in the halls are equipped with 16A, 32A, 63A and 125A type ABB electric sockets.
- Connecting exhibitors' electrical equipment to power supply point's takes place after the insulating resistance of the connected electric circuit has been measured.

Order of electricity for equipped stands includes supply, consumption and one socket (220V-1kW) for Standard Shell Scheme (for Premium Shell Schemes, see description). Additional sockets, lighting devices etc can be ordered on Form T4.2. and T4.4.

PLEASE NOTE: When connecting a power consumer with a capacity above 10kW on an equipped stand, or setting up an internal power supply network, you must comply with the conditions for connecting an electricity supply for space only sites (see left).

The set-up of exhibition equipment and the connection of electrical equipment (except for exhibits) within the standard stand is considered to be an independent building and is subject to paid accreditation.

These requirements apply, among other things, to mobile stands with electric lighting equipment, and to showcases.

The use of household extension cords ("network filters") to connect lighting equipment and household appliances is prohibited. For approval of the lighting equipment used on mobile stands and in shop windows, you need to contact the technical department of BuildExpo LLC.

WATER

*Water connection includes connection of one unit with pipes that have a diameter of 15mm, and cold water intake and drainage pipes 32 mm. Any other pipes or adapters need to be provided by the exhibitor or stand builder. There is a surcharge of € 100 for a connection on the second level of a double decker stand.

Sinks can be ordered on **Form T4.2, T4.4 (If you need hot water please order it for a sink)**. If you have more than 1 item to be connected, please order the according number of connections. There are no water connections available outdoor, only filling/discharging of pools/tubs. Single fill up is made separately to each unit.

COMPRESSED AIR

(prices for the duration of the exhibition)

	Quantity	Price	Total EUR
Compressed air connection, Up to 30m³ / hour (6 bar)	X	EUR 650	
Compressed air connection, Over 30m³ / hour (6 bar)	X	EUR 900	

Pipes have a diameter of 15mm. If you need another diameter you need to bring your own adapter. Compressed air is not available on the second floor of Pavilion 2. If you have more than 1 item to be connected, please order the according number of connections.

 **Do you plan to demonstrate the equipment in action at the stand?** yes no
