

Securika Moscow 2022 will become the main arena for discussing security issues in the new market conditions

Moscow, 25 March 2022

From 12 to 15 April 2022, the 27th International exhibition of security and fire protection equipment and products Securika Moscow 2022 will take place at Crocus Expo.

Securika Moscow is the largest exhibition in Russia and CIS of security and fire protection equipment and products.

This year, more than 200 companies from Russia, Belarus, Kazakhstan, China, Korea, Turkey, Cyprus, and the Czech Republic will showcase at the exhibition. At Securika Moscow will be presented the security systems market: modern technologies and new equipment by domestic and foreign manufacturers and suppliers in five sections.

1. Video surveillance: Beward, IDIS, Tahion, Trassir, Speech Technology Center, ITV, Rubezh, PERGAM, Satvision, and others
2. Access control: Sigur, AAM Systems, Perco, Rusguard, Modus-N, ISBC, Terralink, Ira-prom and others
3. Fire protection: Wagner, Flamax, Pozhtechnika Group, Holding OSK group, PLAZMA-T, EPOTOS, ISP, PLAMYA NTO, ISTA-TECHNICS, and others
4. Signaling and notification: BOLID NVP, Escort Group, Imlight, Ritm, Rielta, Unitest, Sokrat, Integral, PLAZMA-T, and others
5. Perimeter security: TEXHA, TriviTech, START-7, OKHRANNAYA TECHNIKA, UFD-IS, Egoza Applied radiophysics, Fensys, STILSOFT, Stc-group, and others.

The largest trading houses will be represented: LUIS+, AMICOM ARMO-Systems, Vidos, STA, and Torus.

More than 16,000 industry experts visit the exhibition every year. The representatives of more than 7,500 companies from 82 regions of Russia, including specialists from the EAEU countries, have already completed pre-registration.

Novelties

IDIS will introduce Video Wall Station, a device for planning, designing, configuring and using dynamic video walls. The solution allows to connect 4,096 cameras and helps to control 64 video panels.

ISS will demonstrate a geographic information system for monitoring and managing georeferenced objects SecurOS. The product is an effective tool for visualizing the location of objects such as cameras, two-way communication devices, and access control devices on the GIS map.

ARSTEL will show digital mixer-amplifiers, which are designed to amplify and broadcast a digital audio stream. They allow to organize a separate broadcast zone of a distributed IP audio system, connect local sound sources, download, and enable playback of mp3 files via the web interface.

ARMO-Systems will present new 2N intercoms, which are equipped with the 10-inch touch screen, high-definition camera, and powerful processor. They support three types of access technology, including Bluetooth. The case is protected from bad weather and mechanical influences, the front panel is made of tempered glass.

Karneev Systems will showcase the Karneev KS M-230 complex. It is a thermal imager with 9x optical zoom and maximum focal length of 230 mm. The images are broadcast in Full HD. Information from the video camera and thermal imager is displayed on the separate monitors. Work with data and the system is carried out in an application installed on a fault-tolerant server.

Tahion will show an industrial network recorder designed to organize remote viewing, recording, storage and playback of images from 1 to 16 IP cameras (model RSP-16) and from 1 to 32 IP cameras (model RSP-32). The device is suitable for industrial use.

TP-Link will present the Omada cloud solution for business networks. Omada's Software Defined Networking (SDN) platform integrates network devices, including access points, switches and gateways, providing 100% centralized cloud management. Omada creates a highly scalable network—all controlled from a single interface. Seamless wireless and wired connections are provided, ideal for use in hospitality, education, retail, and offices.

Business programme

The current situation requires new solutions. The three-day business programme is aimed at enterprises. The key goal of the events is to unite security market, set their further development, demonstrate new opportunities, and find solutions.

More than 90 experts and leading market representatives will discuss threats, work with the customers, the impact of legislative innovations on business and share experiences.

On 12 April, at the panel discussion "Security market and sanctions. What to expect and what to do?" the market experts will discuss business issues in 2022, opportunities for growth in the Russian market and present customer strategies.

Also, on the first day of the exhibition, the All-Russian Engineering Forum PROPROJECT 2022 will take place. The main topic will be fire safety rules. The speakers will consider a set of rules that will come into force in 2022 and analyze GOSTs and certification for the right to design fire safety equipment for buildings.

On 13 April, the conference "Prospects for the development of biometric technologies and the practice of their application in Russia" will take place. The leading market experts will discuss the future Russian biometrics and present cases of biometrics implementation in various industries. The discussion "Biometrics: how to make it legal" and a practical seminar "Biometrics: safeguarding business tasks" will also take place.

On 13 April, the Forum "AI and video analytics: prospects and challenges" will be held. The speakers will discuss new technologies in video analytics, AI in video surveillance, technology pitfalls, and real cases of implementing smart video analytics.

For the first time, from 13 to 14 April, the SecurikaLab Project Lecture Hall will take place. The designers of fire safety systems, video surveillance and access control systems will have practical seminars from the industry experts.

On 14 April, the round table “Integration of security systems: from monitoring to effective management” will be held. The speakers will talk about integration of security systems and solutions.

Best Innovative Product competition

The annual competition “The Best Innovative Product” take place. The aim of the competition is to find the best security solutions. The jury will evaluate the products of the exhibitors.

For the first time, the nominees will present their innovative products to the visitors.

Partners

Official partner – SIGUR

General partner of the business programme – SIGUR

Partner of the section “Fire protection” – Holding OSK group

Exhibition partner – UNIVIEW

Information partner – TV channel MIR

The Director of Securika Moscow exhibition Natalya Vinogradova: “We invite everyone to the Securika Moscow 2022 exhibition, which remains the largest event in the industry in Russia. Companies need the exhibitions for promotion and understanding the situation on the market.
