2,000+

meetings held

In parallel with Qatar National Vision 2030, as the QDB, we create our strategy in a manner that it will support development and growth by providing long-term socio-economic benefits for the people of Qatar in the main economic sectors under the private sector. With various exhibited products and services and an ever-increasing number of local and foreign exhibitors, Yapi - Turkeybuild Istanbul is a building materials and technologies exhibition that provides first class service, which is why we are attending this year's Yapi exhibition. The exhibition has become a platform that increases the export opportunities for Qatari products, opens up new markets for Qatari manufacturers and ensures the promotion of Qatari products all around the world.

Qatar Development Bank

Yapi - Turkeybuild Istanbul plays a major role in the sector. Yapi exhibition brings all companies in the sector together. Our main goal here was to introduce ourselves to the market. As years passed by, the exhibition has become a platform that provides us with much faster access to both our local and foreign clients, which is why we attend Yapi - Turkeybuild Istanbul almost every year. We have met many of our major local and foreign clients at this exhibition. When we look at the challenges and changing conditions, we can see that the Yapi exhibition provides us with the best platform for reaching our target markets and keeping our brand alive. The exhibition is the right place for leading sector companies who want to grow their business and increase their brand awareness against all odds. We are one of those companies and we are thrilled to have achieved our goals.
